VOLUME II—VITAL STATISTICS.

WILL CONTAIN:

The Tables of Mortality.
The Tables of Births.
The Tables of the Blind, Deaf and Dumb, Insane, and Idiotic.
The Table of Sex, (being Table XXII, of Vol. I.)
The Tables of Ages.

With Maps and Remarks pertinent to the Tables

VOLUME III—INDUSTRY AND WEALTH.

WILL CONTAIN:

The Tables of Wealth, Taxation, and Public Indebtedness.
The Tables of Agriculture.
The Tables of Manufactures.
The Tables of Mining.
The Table of Fisheries.
The Major Tables of Occupations, (being Tables XXVI, XXVII (A,) XXVIII, and XXIX of Vol. I.)

With Maps and Remarks pertinent to the Tables.

DEPARTMENT OF THE INTERIOR, CENSUS-OFFICE,

Washington, D. C., August, 24, 1872.

SIR: I have the honor to report that the last of the tables to be comprised in the volume on the Population of the United States at the Ninth Census, has been sent to press to-day.

The first table of this volume was sent to press June 20, 1871. On the 2d of September, 1871, 1,000 copies of the first four tables were obtained on Department requisition and distributed to members of Congress and to the newspaper press.

On the 26th of December, 1871, I had the honor to submit a report of the operation of the Census Bureau during the year then expiring, which report will be embodied in the volume now in press, and will present substantially all the remarks which are deemed necessary in the publications of the present Census, except such notes and explanations as would be more appropriate in immediate connection with the individual tables to which they relate.

By concurrent resolution of March 8, 1872, 12,000 copies of the first eight tables were ordered printed; and by concurrent resolution of May 23, 1872, another edition of 12,000 was authorized. The number of copies of the complete volume authorized by the concurrent resolution of April 19, 1871, is 25,000. The maps which are to illustrate this volume are already under contract and will be delivered to the Congressional Printer on or before the date at which it is expected the edition will be ready for binding.

The latter half of this volume has been prepared for publication amid the duties and distractions of another Bureau, to the charge of which I was assigned in November, 1871. I trust, however, that an examination of these tables will not disclose any want of labor or of care in the superintendence of the Census work.

I have the honor to be, very respectfully, your obedient servant,

FRANCIS A. WALKER,

Superintendent.

HON. C. DELANO,

Secretary of the Interior.

REPORT

OF THE

SUPERINTENDENT OF THE NINTH CENSUS.

Hon. C. DELANO, *Secretary of the Interior:*

SIR: I have the honor to submit the following report:

The enumeration of inhabitants at the Ninth Census of the United States, which, by law, was commenced on the 1st of June, 1870, was substantially completed by the 9th of January, 1871. At that date returns had been received covering 38,333,417 persons, leaving 224,954, as was subsequently determined, to be returned, more than one-half of whom, it is fair to assume, had then been enumerated. Yet, for this inconsiderable fraction of the population the country was obliged to wait seven and a half months. On the 23d of February returns had been received covering all but 92,266 of the population. The last returns from any of the former free States were received April 3, 1871, comprising 271 names to complete the township of Lodi, Athens County, Ohio. On the 9th of June the number of persons still to be returned was 18,606. On the 23d of June returns were received from the last county of Mississippi. On the 29th of July returns were received from the last county of Texas. On the 23d of August returns were received from the townships of Bowen and Wharton's Creek, Madison County, Arkansas, (304 names,) completing the enumeration.

These delays, most vexatious and most discreditable in a national work of such importance as the census of the United States, were, as you are aware, absolutely unavoidable, with existing census machinery. All the authority and all the resources which the law intrusts to this office and to the Department were employed in abundant season to have secured the completion of the entire work within the time prescribed, but for the ineradicable defects of the act of 1850, under which, with few and slight modifications, the census of the United States continues to be taken. Until the law shall vest in the Department the same control over its agents at the census which is possessed by other Departments in respect to their agents, and by this Department in respect to all its other operations, it will never be practicable to determine, within six months, the period for the completion of the census, nor to provide that, when the work is supposed to be finished, some portion of the territory shall not be found which has not been covered by the enumeration, and in which the service must be organized at the last moment, without due preparation and at a great and increasing disadvantage. With sincere deference, I submit that it is not worthy of a great nation that its census should be so tardily and so loosely taken as is inevitable in the United States under existing provisions of law.

CONSTITUTIONAL POPULATION.

AGGREGATE.—The constitutional population of the United States (excluding, that is, "Indians not taxed" and the inhabitants of the Territories) upon the 1st of June, 1870, as finally determined by the complete census, was 38,115,641. The positive increase during the decade had been 6,931,897, a gain of 22.22 per cent.

The thirty-four States which were in the Union in 1860 were found to have been affected by the changes of ten years, as follows:

Alabama had increased from 964,201 to 996,992, a gain of 3.40 per cent.: its rank among the States being 16 instead of 13, as in 1860.

Arkansas, from 435,450 to 484,471, a gain of 11.26 per cent.: rank, 26 instead of 25.

California, from 379,994 to 560,247, a gain of 47.44 per cent.: rank, 24 instead of 26.
Connecticut, from 460,147 to 537,454, a gain of 16.80 per cent.: rank, 25 instead of 24.
Delaware, from 112,216 to 125,015, a gain of 11.41 per cent.: rank, 34 instead of 32.
Florida, from 140,424 to 187,748, a gain of 33.70 per cent.: rank, 33 instead of 31.
Georgia, from 1,057,286 to 1,184,109, a gain of 12.00 per cent.: rank, 12 instead of 11.
Illinois, from 1,711,951 to 2,539,891, a gain of 48.36 per cent.: rank, 4, as in 1860.
Indiana, from 1,350,428 to 1,680,637, a gain of 24.45 per cent.: rank, 6, as in 1860.
Iowa, from 674,913 to 1,194,020, a gain of 76.91 per cent.: rank, 11 instead of 20.
Kansas, from 107,206 to 364,399, a gain of 239.90 per cent.: rank, 29 instead of 33.
Kentucky, from 1,155,684 to 1,321,011, a gain of 14.30 per cent.: rank, 8 instead of 9.
Louisiana, from 708,002 to 726,915, a gain of 2.67 per cent.: rank, 21 instead of 17.
Maine had decreased from 628,279 to 626,915, a loss of 0.22 per cent.: rank, 23 instead of 22.
Maryland had increased from 687,049 to 780,894, a gain of 13.66 per cent.: rank, 20 instead of 19.
Massachusetts, from 1,231,066 to 1,457,351, a gain of 18.38 per cent.: rank, 7, as in 1860.
Michigan, from 749,113 to 1,184,059, a gain of 58.06 per cent.: rank, 13 instead of 16.
Minnesota, from 172,023 to 439,706, a gain of 155.61 per cent.: rank, 28 instead of 30.
Mississippi, from 791,305 to 827,922, a gain of 4.63 per cent.: rank, 18 instead of 14.
Missouri, from 1,182,012 to 1,721,295, a gain of 45.62 per cent.: rank, 5 instead of 8.
New Hampshire had decreased from 326,073 to 318,300, a loss of 2.38 per cent.: rank, 31 instead of 27.
New Jersey had increased from 672,035 to 906,096, a gain of 34.83 per cent.: rank, 17 instead of 21.
New York, from 3,880,735 to 4,382,759, a gain of 12.94 per cent.: rank, 1, as in 1860.
North Carolina, from 992,622 to 1,071,361, a gain of 7.93 per cent.: rank, 14 instead of 12.
Ohio, from 2,339,511 to 2,665,260, a gain of 13.92 per cent.: rank, 3, as in 1860.
Oregon, from 52,465 to 90,923, a gain of 73.30 per cent.: rank, 36 instead of 34.
Pennsylvania, from 2,906,215 to 3,521,951, a gain of 21.19 per cent.: rank, 2, as in 1860.
Rhode Island, from 174,620 to 217,353, a gain of 24.47 per cent.: rank, 32 instead of 29.
South Carolina, from 703,708 to 705,606, a gain of 0.27 per cent.: rank, 22 instead of 18.
Tennessee, from 1,109,801 to 1,258,520, a gain of 13.40 per cent.: rank, 9 instead of 10.
Texas, from 604,215 to 818,579, a gain of 35.48 per cent.: rank, 19 instead of 23.
Vermont, from 315,098 to 330,551, a gain of 4.90 per cent.: rank, 30 instead of 28.
Virginia had decreased from 1,596,318 to 1,225,163, a loss of 23.25 per cent.: rank, 10 instead of 5.
Wisconsin had increased from 775,881 to 1,054,670, a gain of 35.93 per cent.: rank, 15, as in 1860.

The loss of constitutional population in Virginia was due to the erection of fifty counties into the State of West Virginia, comprising a constitutional population of 442,014, as determined by the Ninth Census. Adding this to the population of the present State of Virginia, we have a total of 1,667,177, a gain of 4.44 per cent. upon the return of Virginia in 1860.

The State of Nebraska, admitted into the Union in 1864, was found to have a constitutional population, on the 1st of June, 1870, of 122,993.

The State of Nevada, likewise admitted in 1864, was found to have a constitutional population of 42,491.

WHITE.—Of this aggregate of 38,115,641, the white population embraced 33,203,128, an increase of 6,512,348 during the decade, or 24.39 per cent.

The white population of the several States had changed as follows:

Alabama, from 526,271 to 521,384, a loss of 0.93 per cent.: rank, 21 instead of 18.
Arkansas, from 324,143 to 362,115, a gain of 11.71 per cent.: rank, 26 instead of 25.
California, from 323,177 to 499,424, a gain of 54.54 per cent.: rank, 22 instead of 26.
Connecticut, from 451,504 to 527,549, a gain of 16.84 per cent.: rank, 20, as in 1860.
Delaware, from 90,589 to 102,221, a gain of 12.84 per cent.: rank, 34 instead of 32.
Florida, from 77,746 to 96,057, a gain of 23.55 per cent.: rank, 35 instead of 33.
Georgia, from 591,550 to 638,926, a gain of 8.01 per cent.: rank, 16 instead of 17.
Illinois, from 1,704,291 to 2,511,096, a gain of 47.34 per cent.: rank, 4, as in 1860.
Indiana, from 1,338,710 to 1,655,837, a gain of 23.69 per cent.: rank, 5, as in 1860.
Iowa, from 673,779 to 1,188,207, a gain of 76.35 per cent.: rank, 8 instead of 13.
Kansas, from 106,390 to 346,377, a gain of 225.57 per cent.: rank, 28 instead of 31.
Kentucky, from 919,484 to 1,098,692, a gain of 19.49 per cent.: rank, 10 instead of 9.

Louisiana, from 357,456 to 362,065, a gain of 1.29 per cent.: rank, 27 instead of 22.
Maine, from 626,947 to 624,809, a loss of 0.34 per cent.: rank, 17 instead of 16.
Maryland, from 515,918 to 605,497, a gain of 17.36 per cent.: rank, 18 instead of 19.
Massachusetts, from 1,221,432 to 1,443,156, a gain of 18.15 per cent.: rank, 7 instead of 6.
Michigan, from 736,142 to 1,167,282, a gain of 58.57 per cent.: rank, 9 instead of 12.
Minnesota, from 169,395 to 438,257, a gain of 158.72 per cent.: rank, 23 instead of 30.
Mississippi, from 353,899 to 382,896, a gain of 8.19 per cent.: rank, 25 instead of 23.
Missouri, from 1,063,489 to 1,603,146, a gain of 50.74 per cent.: rank, 6 instead of 7.
New Hampshire, from 325,579 to 317,697, a loss of 2.42 per cent.: rank, 30 instead of 24.
New Jersey, from 646,699 to 875,407, a gain of 35.37 per cent.: rank, 13 instead of 14.
New York, from 3,831,590 to 4,330,210, a gain of 13.01 per cent.: rank, 1, as in 1860.
North Carolina, from 629,942 to 678,470, a gain of 7.70 per cent.: rank, 15, as in 1860.
Ohio, from 2,302,808 to 2,601,946, a gain of 12.99 per cent.: rank, 3, as in 1860.
Oregon, from 52,160 to 86,929, a gain of 66.66 per cent.: rank, 36 instead of 34.
Pennsylvania, from 2,849,259 to 3,456,609, a gain of 21.32 per cent.: rank, 2, as in 1860.
Rhode Island, from 170,649 to 212,219, a gain of 24.36 per cent.: rank, 32 instead of 29.
South Carolina, from 291,300 to 289,667, a loss of 0.56 per cent.: rank, 31 instead of 28.
Tennessee, from 826,722 to 936,119, a gain of 13.23 per cent.: rank, 12 instead of 10.
Texas, from 420,891 to 564,700, a gain of 34.17 per cent.: rank, 19 instead of 21.
Vermont, from 314,369 to 329,613, a gain of 4.85 per cent.: rank, 29 instead of 27.
Virginia, from 1,047,299 to 712,089, a loss of 32.01 per cent.: rank, 14 instead of 8.
Wisconsin, from 773,693 to 1,051,351, a gain of 35.89 per cent.: rank, 11, as in 1860.

Adding the white population of the State of West Virginia to that given for Virginia, we have a total of 1,136,122, a gain of 8.48 per cent. over the return for Virginia in 1860.

The State of Nebraska, admitted since the last census, was found to have a white population of 122,117.

The State of Nevada, likewise admitted since the last census, was found to have a white population of 38,959.

COLORED.—The colored population of the States had been affected by general causes and the events of the ten years, as follows:

The United States, from 4,427,294 to 4,835,106, a gain of 9.21 per cent.
Alabama, from 437,770 to 475,510, a gain of 8.62 per cent.: rank, 3, as in 1860.
Arkansas, from 111,259 to 122,169, a gain of 9.81 per cent.: rank, 12 instead of 13.
California, from 4,086 to 4,272, a gain of 4.55 per cent.: rank, 29 instead of 25.
Connecticut, from 8,627 to 9,668, a gain of 12.07 per cent.: rank, 26 instead of 22.
Delaware, from 21,627 to 22,794, a gain of 5.40 per cent.: rank, 21 instead of 19.
Florida, from 62,677 to 91,689, a gain of 46.29 per cent.: rank, 14, as in 1860.
Georgia, from 465,698 to 545,142, a gain of 17.06 per cent.: rank, 1 instead of 2.
Illinois, from 7,628 to 28,762, a gain of 277.06 per cent.: rank, 19 instead of 23.
Indiana, from 11,428 to 24,560, a gain of 114.91 per cent.: rank, 20, as in 1860.
Iowa, from 1,069 to 5,762, a gain of 439.01 per cent.: rank, 27 instead of 29.
Kansas, from 627 to 17,108, a gain of 2628.55 per cent.: rank, 23 instead of 31.
Kentucky, from 236,167 to 222,210, a loss of 5.91 per cent.: rank, 10 instead of 9.
Louisiana, from 350,373 to 364,210, a gain of 3.95 per cent.: rank, 7, as in 1860.
Maine, from 1,327 to 1,606, a gain of 21.02 per cent.: rank, 31 instead of 27.
Maryland, from 171,131 to 175,391, a gain of 2.49 per cent.: rank, 11, as in 1860.
Massachusetts, from 9,602 to 13,947, a gain of 45.25 per cent.: rank, 24 instead of 21.
Michigan, from 6,799 to 11,849, a gain of 74.28 per cent.: rank, 25 instead of 24.
Minnesota, from 259 to 759, a gain of 193.05 per cent.: rank, 34 instead of 33.
Mississippi, from 437,404 to 444,201, a gain of 1.55 per cent.: rank, 4, as in 1860.
Missouri, from 118,503 to 118,071, a loss of 0.36 per cent.: rank, 13 instead of 12.
New Hampshire, from 494 to 580, a gain of 17.41 per cent.: rank, 35 instead of 32.
New Jersey, from 25,336 to 30,658, a gain of 21.01 per cent.: rank, 18, as in 1860.
New York, from 49,005 to 52,081, a gain of 6.28 per cent.: rank, 17 instead of 16.
North Carolina, from 361,522 to 391,650, a gain of 8.33 per cent.: rank, 6, as in 1860.
Ohio, from 36,673 to 63,213, a gain of 72.37 per cent.: rank, 16 instead of 17.

Oregon, from 128 to 346, a gain of 170.31 per cent.: rank, 37 instead of 34.
Pennsylvania, from 56,949 to 65,294, a gain of 14.65 per cent.: rank, 15, as in 1860.
Rhode Island, from 3,952 to 4,980, a gain of 26.01 per cent.: rank, 28 instead of 26.
South Carolina, from 412,320 to 415,814, a gain of 0.85 per cent.: rank, 5, as in 1860.
Tennessee, from 283,019 to 322,331, a gain of 13.89 per cent.: rank, 8, as in 1860.
Texas, from 182,921 to 253,475, a gain of 38.57 per cent.: rank, 9 instead of 10.
Vermont, from 709 to 924, a gain of 30.32 per cent.: rank, 32 instead of 30.
Virginia, from 548,907 to 512,841, a loss of 6.57 per cent.: rank, 2 instead of 1.
Wisconsin, from 1,171 to 2,113, a gain of 80.44 per cent.: rank, 30 instead of 28.

Adding the colored population of the State of West Virginia to that given for Virginia, we have a total of 530,821, a loss of 3.29 per cent. upon the return for Virginia in 1860.

The State of Nebraska, admitted since the last census, was found to have a colored population of 789.

The State of Nevada, likewise admitted since the last census, was found to have a colored population of 357.

CHINESE.—Twenty-three of the States were found to contain "Chinese," which description for census purposes was held to embrace Japanese, (who are, however, distinguished in the tables of population,)but to exclude Hawaiians. The number reported in each State was as follows: Arkansas, 98; California, 49,310; Connecticut, 2; Georgia, 1; Illinois, 1; Iowa, 3; Kentucky, 1; Louisiana, 71; Maine, 1; Maryland, 2; Massachusetts, 97; Michigan, 2; Mississippi, 16; Missouri, 3; Nevada, 3,152; New Jersey, 15; New York, 29; Ohio, 1; Oregon, 3,330; Pennsylvania, 14; South Carolina, 1; Texas, 25; Virginia, 4.

INDIANS TAXED.—In the absence of any constitutional, legal, or judicial definition of the phrase "Indians not taxed," as found in the Constitution and in the census law of 1850, it has been held for census purposes to apply only to Indians maintaining their tribal relations and living upon Government reservations.

The broken bands and the scattered remnants of tribes still to be found in many States of the Union, though generally in a condition of pauperism, have been included in the enumeration of the people. By the fact of breaking away from their tribal relations they are regarded as having entered the body of citizens, and as subject to taxation from the point of view of the Constitution, although they may be exempted actually from taxation by local legislation or by the accident of pauperism. It has been held that it was not necessary that a member of this race should be proved to have actually paid taxes, in order to take him out of the class "Indians not taxed," but only that he should be found in a position, so far as the authorities or agents of the census can know, to be taxed were he in possession of property. His pauperism has been regarded as an individual accident, which cannot possibly affect his constitutional relations. Even where the lands formerly belonging to a tribe have been granted in severalty, without the right of alienation or sale, and the land itself exempted from taxation, such special provisions have been regarded rather as an exception to ordinary legislation in respect to personal rights and personal obligations, made in the interest of the community, than as creating a class to be excluded from the enumeration of the people. The provisions of the Constitution in regard to the enumeration of Indians, being invidious and opposed to the general spirit of that instrument, and even more emphatically opposed to the spirit of recent legislation and of the late constitutional amendments, should be construed strictly and not liberally.

In 1860 the same principle appears to have been applied in determining the representative population of the States. Reference to pages 598 and 599 of the population volume of the Eighth Census will show that all the Indians embraced in the table of general population were included in the representative population of their respective States, except for the State of California.

The reason for excluding Indians in making up the representative population of California was undoubtedly found in the fact that in 1860 the Indians of that State were mainly upon Government reservations, some of which have since been abolished. There appears no longer to be any reason for treating the State of California exceptionally in respect to the Indians found upon its territory. To have made the treatment of this class at the census of 1860 consistent throughout, the 17,798 Indians of California should not have been included at all in the statements of constitutional population.

The number of Indians in each State returned under this construction, as forming a part of the constitutional population, was as follows for each State of the Union, except Delaware, in which State no Indians were found: Alabama, 98; Arkansas, 89; California, 7,241; Connecticut, 235; Florida, 2; Georgia, 40; Illinois, 32; Indiana, 240; Iowa, 48; Kansas, 914; Kentucky, 108; Louisiana, 569; Maine, 499; Maryland, 4; Massachusetts, 151; Michigan, 4,926; Minnesota, 690; Mississippi, 809; Missouri, 75; Nebraska, 87; Nevada, 23; New Hampshire, 23; New Jersey 16; New York, 439; North Carolina, 1,241; Ohio, 100; Oregon, 318; Pennsylvania, 34; Rhode Island, 154; South Carolina, 124; Tennessee, 70; Texas, 379; Vermont, 14; Virginia, 229; West Virginia, 1; Wisconsin, 1,206.

HALF-BREEDS.—Another question seriously affecting the return of Indians in the census is the treatment of half-breeds, in which term persons with any perceptible trace of Indian blood, whether mixed with white or with negro stock, are popularly included. How shall these be treated? Shall they be regarded as following the condition of the father or of the mother? Or, again, shall they be classified with respect to the superior or to the inferior blood? When it is considered how few of pure Indian race are to be found outside of Government reservations, and how variously mixed are even the camps and settlements, popularly known as Indian, in the older States of the Union, it will be seen that the decision of the question must affect in an important degree the numbers of this class to be returned in the census.

It has been held that in treating this question the Census Office is not to be concluded or in the least constrained by analogy from laws or judicial decisions relating to the former slave population of the country. The rule that the child should follow the condition of the mother was the bad necessity of a bad cause, which required every point to be construed against freedom. Something very nearly opposed to this would seem to be in accordance with the present spirit of our laws, as well as to be the dictate of common sense. The principle which has governed in the classification of persons of part-Indian blood in the present census has been as follows: Where persons reported as "Half-breeds" are found residing with whites, adopting their habits of life and methods of industry, such persons are to be treated as belonging to the white population. Where, on the other hand, they are found in communities composed wholly or mainly of Indians, the opposite construction is taken. In a word, in the equilibrium produced by the equal division of blood, the habits, tastes, and associations of the half-breed are allowed to determine his gravitation to the one class or the other. It is believed that this is at once the most logical and the least cumbersome treatment of the subject, in the manifest inexpediency of attempting to trace and record all the varieties of this race, especially considering the small and fast-decreasing numbers in which it is found within the States of the Union.

EMANCIPATION AS AFFECTING REPRESENTATIVE POPULATION.

But the statements presented above do not express the full measure of the political effects which have been wrought by the changes of the ten years ending June 1, 1870.

At each of the eight preceding censuses, the constitutional population of the United States has exceeded the representative population by a rate ranging from 5.34 to 7.37 per cent., by reason of the exclusion of two-fifths of the slaves from the basis of representation.

Assuming that the free colored population in 1870 would have borne the same ratio to the total colored population as in 1860, emancipation has added to the representative population of fifteen of the States existing in 1860, represented at present by sixteen States, in consequence of the organization of the State of West Virginia,) in proportions varying from 0.61 to 29.88 per cent. In Alabama the effect of this change is to add 23.40 per cent. to the otherwise representative population: in Arkansas, 11.20 per cent.; in Delaware, 0.61 per cent.; in Florida, 23.83 per cent.; in Georgia, 22.36 per cent.; in Kentucky, 6.87 per cent.; in Louisiana, 23.42 per cent.; in Maryland, 4.80 per cent.; in Mississippi, 27.26 per cent.; in Missouri, 2.73 per cent.; in North Carolina, 15.46 per cent.; in South Carolina, 29.88 per cent.; in Tennessee, 11.09 per cent.; in Texas, 14.11 per cent.; in Virginia, 12.85 per cent.

The total effect of this cause is to add 13.92 per cent. to the otherwise representative population of the Southern States, and 4.60 per cent. to the otherwise representative population of the United States.

ACTUAL PRESENT REPRESENTATIVE POPULATION.

The joint result of the changes in the constitutional population of the several States, and of the emancipation of the slave population in the fifteen Southern States, is to increase the representative population of the Union to 38,115,641 as against 29,550,028,* being a gain of 28.99 per cent. over that of 1860, distributed as follows:

Alabama, from 790,169 to 996,992, a gain of 26.17 per cent.
Arkansas, from 391,004 to 484,471, a gain of 23.90 per cent.
California, from 362,196 to 560,247, a gain of 54.68 per cent.
Connecticut, from 460,147 to 537,454, a gain of 16.80 per cent.
Delaware, from 111,496 to 125,015, a gain of 12.13 per cent.
Florida, from 115,726 to 187,748, a gain of 62.23 per cent.
Georgia, from 872,406 to 1,184,109, a gain of 35.73 per cent.

* The column for representative population as found upon pp. 508 and 509 of the population volume of the Eighth Census, contains an error of 100 in the State of Pennsylvania, which has here been corrected.

Illinois, from 1,711,951 to 2,539,891, a gain of 48.36 per cent.
Indiana, from 1,350,428 to 1,680,637, a gain of 24.45 per cent.
Iowa, from 674,913 to 1,194,020, a gain of 76.91 per cent.
Kansas, from 107,206 to 364,399, a gain of 239.91 per cent.
Kentucky, from 1,065,490 to 1,321,011, a gain of 23.98 per cent.
Louisiana, from 575,311 to 726,915, a gain of 26.35 per cent.
Maine, from 628,279 to 626,915, a loss of 0.22 per cent.
Maryland, from 652,173 to 780,894, a gain of 19.74 per cent.
Massachusetts, from 1,231,066 to 1,457,351, a gain of 18.38 per cent.
Michigan, from 749,113 to 1,184,059, a gain of 58.06 per cent.
Minnesota, from 172,023 to 439,706, a gain of 155.61 per cent.
Mississippi, from 616,652 to 827,922, a gain of 34.26 per cent.
Missouri, from 1,136,039 to 1,721,295, a gain of 51.52 per cent.
Nebraska, 122,993, admitted since 1860.
Nevada, 42,491, admitted since 1860.
New Hampshire, from 326,073 to 318,300, a loss of 2.38 per cent.
New Jersey, from 672,027 to 906,096, a gain of 34.83 per cent.
New York, from 3,880,735 to 4,382,759, a gain of 12.94 per cent.
North Carolina, from 860,197 to 1,071,361, a gain of 24.55 per cent.
Ohio, from 2,339,511 to 2,665,260, a gain of 13.92 per cent.
Oregon, from 52,465 to 90,923, a gain of 73.30 per cent.
Pennsylvania, from 2,906,215 to 3,521,951, a gain of 21.19 per cent.
Rhode Island, from 174,620 to 217,353, a gain of 24.47 per cent.
South Carolina, from 542,745 to 705,606, a gain of 30.01 per cent.
Tennessee, from 999,513 to 1,258,520, a gain of 25.91 per cent.
Texas, from 531,188 to 818,579, a gain of 54.10 per cent.
Vermont, from 315,098 to 330,551, a gain of 4.90 per cent.
Virginia, from 1,399,972 to 1,225,163, a loss of 12.49 per cent.
West Virginia, 442,014, organized since 1860.
Wisconsin, from 775,881 to 1,054,670, a gain of 35.93 per cent.

APPORTIONMENT OF REPRESENTATIVES UNDER THE NINTH CENSUS.

With a total representative population of 38,115,641, and with the number of Representatives in Congress fixed by the act of March 4, 1862,* at 241, the application of the rule for apportionment prescribed by the act of May 23, 1850,† is found to entitle the several States of the Union to representation as follows: Alabama, 6; Arkansas, 3; California, 4; Connecticut, 3; Delaware, 1; Florida, 1; Georgia, 7; Illinois, 16; Indiana, 11; Iowa, 7; Kansas, 2; Kentucky, 8; Louisiana, 5; Maine, 4; Maryland, 5; Massachusetts, 9; Michigan, 7; Minnesota, 3; Mississippi, 5; Missouri, 11; Nebraska, 1; Nevada, 1; New Hampshire, 2; New Jersey, 6; New York, 28; North Carolina, 7;

Be it enacted, &c., That from and after the third day of March, eighteen hundred and sixty-three, the number of members of the House of Representatives of the Congress of the United States shall be two hundred and forty-one; and the eight additional members shall be assigned one each to Pennsylvania, Ohio, Kentucky, Illinois, Iowa, Minnesota, Vermont, and Rhode Island.

Approved, March 4, 1862.

† SECTION 25. *And be it further enacted*, That so soon as the next and each subsequent enumeration of the inhabitants of the several States, directed by the Constitution of the United States to be taken, shall be completed and returned to the office of the Department of the Interior, it shall be the duty of the Secretary of the Interior to ascertain the aggregate representative population of the United States, by adding to the whole number of free persons in all the States, including those bound to service for a term of years and excluding Indians not taxed, three-fifths of all other persons; which aggregate population he shall divide by the number two hundred and thirty-three, and the product of such division, rejecting any fraction of a unit, if any such happen to remain, shall be the ratio, or rule of apportionment, of representatives among the several States under such enumeration; and the said Secretary of the Department of the Interior shall then proceed, in the same manner, to ascertain the representative population of each State, and to divide the whole number of the representative population of each State by the ratio already determined by him as above directed; and the product of this last division shall be the number of Representatives apportioned to such State under the then last enumeration: *Provided*, That the loss in the number of members caused by the fractions remaining in the several States, on the division of the population thereof, shall be compensated for by assigning to so many States having the largest fractions, one additional member each for its fraction as may be necessary to make the whole number of Representatives two hundred and thirty-three: *And provided also*, That if, after the apportionment of the Representatives under the next, or any subsequent census, a new State or States shall be admitted into the Union, the Representative or Representatives assigned to such new State or States shall be in addition to the number of Representatives herein above limited, which excess of Representatives over two hundred and thirty-three shall only continue until the next succeeding apportionment of Representatives under the next succeeding census.

Approved, May 23, 1850.

Ohio, 17; Oregon, 1; Pennsylvania, 22; Rhode Island, 1; South Carolina, 4; Tennessee, 8; Texas, 5; Vermont, 2; Virginia, 8; West Virginia, 3; Wisconsin, 7.

With a view to easier reference and verification, the process by which these results are obtained is indicated in the following table; and for the greater convenience, possibly, of members of Congress in discussing the effect of any enlargement of the representation, up to the limit of twenty-five per cent., the calculation has been repeated, in respect to each State, on the assumption of an increase in the number of members of the House of Representatives, successively, to 250, 260, 270, 283, 292, and 300:

	STATES.	Representative population.	241. Ratio: 1 to 158,156.			250. Ratio: 1 to 152,463.			260. Ratio: 1 to 146,599.			270. Ratio: 1 to 141,169.			283. Ratio: 1 to 134,684.			292. Ratio: 1 to 130,533.			300. Ratio: 1 to 127,052.

*Subject to constitutional provision assigning at least one Representative to each State, whatever its population.

TRUE POPULATION.

The Territories.—The Constitution, as a matter of course, contains no requirement for any enumeration of persons outside the States of the Union. The census law of 1850, however, makes provision for enumerating the inhabitants of the several Territories upon the same terms as the inhabitants of the States; and such enumeration has been made in connection with the Ninth Census. The results will be found in detail in the several tables of the present volume, and in the aggregate, as well as with certain distinctions of race and color, in the table following.

Alaska.—No special provision of law exists for any enumeration within the newly acquired District of Alaska; nor was it found practicable to organize the census service there under the general powers conferred by the act of 1850, or as an incident to the operations of the Treasury or the War Departments. In order, however, to present the statistics of the true population of the country formally complete, that district has been included in the table following, the population of the several classes being there stated according to the best available data, consisting mainly of reports, nominal lists, &c., from officers of the Army on duty in that military department.

Indians not taxed.—It is to be regretted that the census law of 1850, while extending the enumeration required by the Constitution to the inhabitants of the Territories, should have followed the narrower rule of that instrument in respect to the Indian population. The phrase of the Constitution, "Indians not taxed," seems to have been adopted by the framers of the census law as a matter of course. Now the fact that the Constitution excludes from the basis of representation "Indians not taxed" affords no possible reason why, in a census which is on its face taken with equal reference to statistical as to political interests, such persons should be excluded from the population of the country. They should, of course, appear separately, so that the provisions of the Constitution in regard to the apportionment of Representatives may be carried out; but they should appear, nevertheless, as a constituent part of the population of the country viewed in the light of all social, economical, and moral principles. An Indian not taxed should, to put it upon the lowest possible ground, be reported in the census just as truly as the vagabond or pauper of the white or the colored race. The fact that he sustains a vague political relation is no reason why he should not be recognized as a human being, by a census which counts even the cattle and horses of the country. The practical exclusion of Indians from the census creates a hiatus which is wholly unnecessary, and which goes to impair that completeness which affords a great part of the satisfaction of any statistical work. With a view, therefore, to reaching the true population of the country as nearly as is practicable in the absence of distinct authority for the appointment of assistant marshals to enumerate the several tribes and bands of Indians, inquiries were conducted extensively through the agents of the Indian Office during the year 1870, the result of which, it is believed, has been to secure a closer approximation to the true numbers of this class of the population than has ever before been effected.

The following table, therefore, in which these several elements, omitted from the enumeration, are made to appear, presents the ultimate facts of the population of the United States, so far as it is possible to reach them by all the agencies directly or indirectly at the command of the authorities of the Census. In this table, however, no attempt has been made to allow for omissions occurring in the enumeration of the classes of persons recognized by the census law and embraced on the schedule of inhabitants. It is one of the faults of the present system that not only will such omissions occur, but they occur so erratically and irrationally as to make it impossible to reach anything like a satisfactory estimate of their extent, or their distribution between classes of the population or sections of the country.

TABLE OF TRUE POPULATION.

RETARDATION OF THE NATIONAL INCREASE.

Undoubtedly much popular disappointment exists at finding the population of the country below forty millions, exclusive of Indians. But it must be remembered that nearly all who had made a special study of the laws of population were, before the enumeration, agreed in placing the total number of inhabitants in the neighborhood of thirty-nine millions. Those who looked for a higher figure, of whom the writer confesses to have been one, took counsel rather of their patriotism than of their judgment, and would have been troubled to give a solid reason for such an expectation. A few simple considerations will suffice to show that the argument was altogether with those who accepted the smaller number.

But for the war and for causes which, whether due to the war or not, came in at nearly the same time, the population of the United States might have been expected, according to ascertained rates of increase, to be in the neighborhood of forty-one and a half millions on the 1st of June, 1870. The rule of geometrical progression has, indeed, been invoked by some to prove that our population, but for the war, would have reached forty-two and a half millions. Geometrical progression is, however, attained in few things human, and maintained long in none. A better rule for finding the population of the country would have been by the use of the mathematical principle of differences, second differences being assumed constant. The following table, prepared by E. B. Elliott, esq., chief clerk of the Bureau of Statistics, exhibits the true projection of the population of 1870, according to the line of ascent from 1830 to 1860:

	1830.	1840.	1850.	1860.	1870.
Population	12, 866, 020	17, 069, 453	23, 191, 876	*31, 399, 300	41, 609, 000
First differences	.....	4, 203, 433	6, 122, 423	8, 207, 424	10, 209, 700
Second differences	.....	.....	1, 918, 990	2, 085, 001	2, 002, 000

* Excluding Indians, as previously.

It will require but a brief review of the notorious and palpable effects of the war to account for the loss of the three millions which make up the difference between the population of the country as projected from previous experience and the population reached by the census.

First. The retardation of increase in the colored population.

To make up the total of forty-one and a half millions we should have had to rely on the colored element for an increase of something like one million, which would have been their proportional gain in ten years, according to previous experience. This expected gain has been so far neutralized that we have instead but 438,179 as the increase of this portion of our population. Drawn largely from the plantations, where their increase was natural, rapid, and sure, to cities and camps, where want, vice, and pestilence made short work of the multitudes hastily gathered, inadequately provided for, and left for the first time to their own control, while so much of the impulse to procreation as depended on the profits of slave-breeding was withdrawn by the abolition of chattelism, it is only to be wondered at that the colored people of the South have held their own in the ten years since 1860.

Second. The direct loss by wounds and disease.

The losses of the Union armies are fixed by the Surgeon General's Office at something over 304,000. This sum, however, embraces only those who died during their term of service. There were discharged 285,000, on account of the several causes of disability recognized by the medical authorities of the Army. Probably two-thirds of these were discharged for disabilities not immediately affecting the duration of life. It is probably fair to assume that the remaining third may be added to the direct losses of the Army from wounds or disease.

Tens of thousands were discharged to die; tens of thousands died within the first few months after discharge. Tens of thousands more lingered through the first or second year. If, in addition to these numbers, we allow for the accelerated mortality of the two millions of persons enlisted into the service of the United States who neither died in service nor were discharged for disability, but who carried out with them the seeds of disease contracted under the hardships and exposures of campaign, or returned to civil life with shattered constitutions though with no developed disease, 500,000 will surely be a moderate estimate for the direct losses among the Union armies.

The losses of the so-called confederate armies are less easily and satisfactorily determined. We know that the total number of men enlisted into that service was scarcely more than half the aggregate of enlistments on the Union side. But, as an offset, three things are notorious: First, the average term of service was much longer, being generally "for the war;" second, the material of the confederate armies was more completely and continuously used; third, a much larger proportion of the sick and wounded died, from the want of skilled medical and surgical

attendance, of proper medical supplies, and of stimulating and nourishing food. Without attempting to deal at all nicely with this subject, it is difficult to see how any one could, upon reflection, place the losses of the confederate armies at less than 350,000 men.

We reach, therefore, the total result of a direct loss to the male population of the country of not less than 850,000. Popular opinion would undoubtedly place this total much higher, and, in such a matter, popular judgments are quite as likely to be correct as judgments formed from the contemplation of statistical data necessarily partial and incomplete.

Third. The indirect loss by the war, in the check given to the increase of the native population.

For nearly four years an average body of a million and a half of men, from eighteen to forty-five years of age, were withdrawn from domestic life. Speaking roughly, one-half of these were unmarried men, who, on account of their military engagements failed to form marriage relations. The other half were married men, whose families were rarely increased by birth during the continuance of the war. The number thus withdrawn from domestic life for four years bore no small proportion to the total male population of the ages when marriages are formed and children begotten.

Fourth. The indirect loss by the war, in the check given to immigration.

For the four years preceding the war the accession by immigration aggregated 649,354; in the four years following the war, 1,163,128; during the four years of the war, only 553,605. Assuming for the middle period a mean between the first and last periods, we shall have a loss, from this source alone, of 353,000.

A fifth cause may be alluded to, namely, the notorious growth of habits of life in many sections of the country which tend strongly to reduce the rate of the national increase, and which, if persisted in, will make the showing of another census hardly so satisfactory as the present, even without a devastating war to account for the loss of hundreds of thousands in hospital and on the battle-field. No one can be familiar with life in the Eastern and Middle States generally, and in the Western cities, and not be aware that children are not born to American parents as they were in the early days of the country. Luxury, fashion, and the vice of "boarding" combine to limit the increase of families to a degree that in some sections even threatens the perpetuation of our native stock. This tendency is not one that requires to be brought out by statistical comparisons. It is patent, palpable, and needs no proof.

There are still other indications that the United States, as they are passing "from the gristle to the solid bone of manhood," are also losing somewhat of that rapid growth which is the characteristic of youth alone; and that we shall have to be content hereafter, as a nation, with something less than our former rate of increase. But this is not the place to dwell on such considerations. Enough has been adduced to account amply for the falling-off in the national rate of progress during the decade. Indeed, under such tremendous losses as the country has sustained, it is wholly wonderful that it should have held its own, and even made a positive gain in ten years of more than seven millions. Nothing but the irresistible vigor of our stock, the noble opportunities afforded by our expanding territory, and the provocatives of our bracing air and generous diet, would have sufficed to repair such losses and make such gains.

THOROUGHNESS OF THE ENUMERATION.

It is believed that the enumeration of the people at the present census has been as carefully and honestly performed, in every part of the country, as at any preceding period.* In no section has the percentage of loss, taking city and country together, been considerable. The field, on the whole, has been thoroughly gleaned, and, in the great majority of subdivisions, far more pains has been taken, under the stimulus of public criticism, than the Government paid for, or had reason to expect.

It is not claimed that the census of any State is perfect, for a perfect census cannot be taken in any State with the machinery established by existing laws. The omissions which have occurred, however, are probably not sufficient in any case to affect the practical result of congressional representation, although any degree of error, in a work of such a character, is excessively annoying to every person of the least statistical instinct.

* I cannot but believe, upon full consideration of all the information which it has been possible to gather on the subject, that the two practices of "farming out" subdivisions, and of "taking the census" at elections and on court days, instead of through the visitation by the assistant marshal of each dwelling-house in his subdivision, in turn, were general throughout the Southern States in 1850 and 1860, and not infrequent elsewhere. Both these practices are in direct violation of law and of the assistant marshal's oath. Both are in the last degree destructive of all accuracy of enumeration. At the Ninth Census, the most stringent instructions were issued on this subject, criminal prosecution was threatened against all offenders, and general publication was made through the newspapers of the fact that such practices were illegal, and information was solicited of all violations of law in these respects. It is believed that this effort resulted, notwithstanding the absence of legal provision for the proper inspection of the census work during its progress, in the suppression, substantially, of these practices.

COMPLAINTS AGAINST THE CENSUS.

Complaints against the census, under the protracted system of enumeration, are a matter of course. Intelligent and candid persons will say, and persist in saying, that they and their families have not been taken, though all the time their names are found fully and fairly written upon the returns of the assistant marshal. This sort of complaint is to be expected; and no one who has had experience of these matters will give any credence to such statements. In the case of ninety-nine out of a hundred individual complaints of persons or families omitted in the enumeration, examination of the returns will prove the census right—the explanation being that, after failing, perhaps upon repeated trials, to obtain the information directly, the assistant marshal has obtained it as best he could, from neighbors, from relatives, from business partners, from family physicians, or even from family tradesmen; not a good way to obtain it, certainly, but under the American system often the only one open to the agent of the census.

The largest proportion of actual to reported omissions which was brought to the notice of the Census Office during the enumeration, (except in localities where, by reason of the flagrant delinquency of the assistant marshal a re-enumeration was ordered,) was in Hartford, Connecticut, where, out of twenty-one cases of complaint, it was found that in thirteen the names had actually been taken; in three instances individuals had been forgotten by employers or landlords, when making return of their households, no fault being imputed to the agents of the census; in the remaining five cases the names of the parties had been omitted by reason of their being out of town at the time their houses were visited by the assistant marshal. Out of many hundreds of cases investigated by the marshal of New York City, in all but five or six the names were found duly recorded on the lists of inhabitants, or else it was found, on inquiry at the residences indicated, that no such persons were known: the charges of omission having been made through the public press wholly for political effect.

Another class of complaints, entitled to more consideration, have been due to exaggerated and unreasonable expectations as to the population to be ascertained at the present census, particularly in regard to certain cities and sections. The internal changes of the United States for the last ten years have been so fierce and rapid as to put calculation at defiance. In the absence of definite information estimates as to the growth of cities and States soon become wild and extravagant. Cities vie with cities, and States with States, in their boasts of population and of wealth, like individuals bidding against each other at an auction, until the most palpable facts in the case are lost sight of, and the extravagances of competitors become a sufficient reason for even more extravagant estimates. Claims that perhaps were first made in a spirit of banter soon are taken as serious, and in the event people become angry to find that not true which was originally asserted only to irritate a rival.

It is worthy of remark in this connection that few, if any, serious complaints have been made in regard to the results of the census in cities of the second or third class. It has been mainly in the smaller cities, and in smart towns that aspire to be considered cities, as also in cities of the first class, disputing the supremacy of the continent, that these complaints have arisen. It is worthy of remark, also, in the same connection, that the complaints, in the great majority of such instances, have been not so much on account of the inadequate representation of the town or city itself, as of the superiority attributed to some immediate rival. If one will try to imagine any one of fifty enterprising western cities perfectly satisfied with the result of the census in respect both to its own population and to that of its neighbors, he will be in a fair position to decide on the degree of credit which should be attached to vague and unsupported complaints against the census.

RE-ENUMERATION OF NEW YORK AND PHILADELPHIA.

The severest test of the general accuracy of the Ninth Census that could possibly have been applied, was through the re-enumeration of the cities of New York and Philadelphia, under the provisions of an executive order.

Popular opinion had attributed to Philadelphia a population of at least 800,000 souls. There were not wanting intelligent persons who claimed for the city as many as 850,000 inhabitants. When, therefore, the progress of the census indicated the return of only a little over 650,000, great and not unreasonable disappointment and dissatisfaction were felt, to meet which the President, most fortunately, directed the census to be retaken. No complaints had been made in respect to the manner in which the United States marshal or his assistants discharged their duties. It was admitted that a better body of officers had never served the Government; but it was urged that the number of the usual inhabitants of Philadelphia absent from the city during the season when, by law, the enumeration was to be conducted, was so great as to reduce the population by at least one-sixth, if not one-quarter.

The re-enumeration was conducted in the fullest concert and co-operation with the city authorities—in my belief so much so as to render the agents of the census even unduly ready to admit names into their lists where there was reasonable doubt whether they had not already been taken elsewhere; the season was that in which the city realizes

its greatest population, and thousands are back for the winter who have country-seats at which they might properly be taken under the law: yet the gain by re-enumeration was but 16,745 on a former return of 657,277, or two and a half per cent.

In New York the vindication of the census was even more complete. The city authorities had there committed themselves to the deepest hostility against the census; and both the original enumeration and the re-enumeration under executive order were followed with eager and vindictive criticism, while every obstacle, short of actual physical resistance, was thrown in the way of the agents of the General Government. Yet the gain upon re-enumeration, after a most searching and comprehensive canvass, which I do not hesitate to pronounce a masterpiece of executive function, reflecting the highest credit on the distinguished officer who conducted it in person, was but 18,318, on an original return of 923,944,* being, as nearly as possible, two per cent.

Differences no greater than these between a summer and a winter enumeration of cities of the extent of New York and Philadelphia, and with such peculiar conditions in respect to industry and residence, prove conclusively that the United States marshals and their assistants overcame, to a remarkable degree, the difficulties attending the census of such a population in the summer months. In New York, especially, the result of the re-enumeration may fairly be taken as indicating the *minimum* of omission to be expected in the census of city populations under existing laws. I say *minimum*, because I feel assured that the degree of executive ability brought to the work in New York cannot be surpassed and will rarely be equaled.

THE ESSENTIAL VICIOUSNESS OF A PROTRACTED ENUMERATION.

In dealing so summarily with the charges that are made popularly and loosely against every enumeration, during its progress, I do not wish to be understood as asserting for the Ninth Census anything like absolute completeness. The real faults of the census are generally those that are not complained of. The individuals and classes of citizens making the loudest complaints, are commonly not those with respect to whom the census commits its errors. The cities and sections that are most noisy in their dissatisfaction are commonly those which are best taken, and for that very reason. It is in regions where apathy prevails in regard to the results of the enumeration, and it is in respect to individuals and families that neither write for the newspapers nor read them, that the greater part of the omissions of the census occur. Yet, in each and all, more of error inevitably enters, through the inadequacy of the provisions of the existing census law, than is pleasant to contemplate. The protracted system of enumeration is essentially vicious, and it is not possible to cure the evil by any course of administrative treatment.

By the census law of 1850 assistant marshals were allowed until the 1st of November to complete the enumeration of their subdivisions, and the Secretary of the Interior was authorized, at his discretion, to extend the time in certain districts until the 1st of January following. The provisions of law remained the same for the census of 1860, but the instructions of the Secretary of the Interior required assistant marshals to complete their returns on or before the 15th of August. This limitation was of course not authoritative, and no administrative correction could be applied to any assistant marshal who should take for his work the whole time allowed by law. By the act of May 6, 1870, the time for making returns on Schedule No. 1, was limited to the 10th of September, while the Secretary of the Interior was authorized to grant an extension not later than the 1st of October. The period, therefore, contemplated for the completion of the census was, in round numbers, one hundred days.

Now, where the enumeration of a people is extended over such a period of time, a *de facto* enumeration is of course impossible. The country must be content with an enumeration which affords, in its very nature, but an approximation, more or less inexact, to the real number of inhabitants. A definition of *residence* must be introduced into the law and the schedules; and it is inevitable that by the inherent vagueness of such definitions considerable numbers will escape enumeration. This is not a question of the strong or loose administration of the law. It is involved in the very provision of the law by which a period of one hundred days is taken. The most familiar illustration is that of a ward of a city. The enumeration commencing on the 1st of June, and being protracted until the 10th of September, a family moving on the 1st of July or the 1st of August from a portion of a ward not yet visited by the assistant marshal, into a portion of another ward where the assistant marshal has already made his rounds, will of course escape enumeration, unless the head of the family so thoroughly appreciates the importance of the census as to be at pains to hunt up the proper person and offer information, some portions of which are never given without considerable reluctance. It is assuming more than is fair, to suppose that one out

* The first published statement of the population of New York, by the original enumeration, was 925,422. The tabulation of the returns by age and sex showed several hundred children born after the 1st of June, 1870. In addition, the registers of one or two wards omitted [illegible] the entire year had been, it is believed without [illegible] by assistant marshals upon their schedules. The registers of these wards, under the plain forms of the census law, reduced the population, as by the first enumeration, to the number [illegible] by the [illegible].

of a hundred of persons so situated will be at this trouble to perform a duty necessarily more or less unpleasant. When it is considered how many thousands of persons in every large city, how many tens of thousands in a city like New York, not only live in boarding-houses, but change their boarding-houses at every freak of fancy or disgust, not to speak of those who leave under the stress of impecuniosity and therefore are not likely to leave their future address or advertise their residence, it will be seen how utterly unfitted is such a system of enumeration to the social conditions of the country at the present time. Of course, the extent to which this liability to omission will affect the results of the census depends entirely upon the stability of the population. In rural districts, where a family may be expected to reside, not only for the entire year but for a term of years, in the same house, the omissions on this account are not large. The danger here is mainly from the liability of assistants to overlook houses situated on by-roads, and cabins standing in the woods or in the fields. This liability, however, is not greater in an enumeration protracted over three or four months than in an enumeration taken on a single day. But wherever we have to deal with the population of cities and manufacturing towns, the percentage of loss becomes considerable.

It is commonly asserted that an exact enumeration is impossible in this country, and the Territories and some of the more sparsely-settled States are frequently adduced to prove the impossibility of taking all the inhabitants on one day. There are undoubtedly regions in which such an enumeration would require that nearly every man should be commissioned as an assistant marshal for his own family, on account of the great distance between settlements. But if this method has advantages over a protracted enumeration, conducted upon a factitious definition of residence, and attended with such difficulties as have been indicated, it is unquestionably practicable to obtain these advantages in the enumeration of ninety-nine per cent. of the population of the country at the present time, leaving the disadvantages of a protracted enumeration to be experienced only in respect to the remaining one per cent.

If the formation of subdivisions and the confirmation of assistants were vested in the Department, with proper discretion as to the use of special agents, it would be possible to take the census of every city and manufacturing town in the United States in a single day, and to complete the enumeration of all properly agricultural sections in a period not exceeding three days, allowing, if need be, for the completion of the purely mining States and the Territories, and perhaps for some portions of Texas, California, Kansas, and Nebraska, a longer period of time, not to exceed thirty days. Such an enumeration could be accomplished in the present condition of the settlement of the United States. It would cost little if any more than a census taken according to the present methods, and would be inexpressibly more satisfactory.

The fact that the better method of enumeration cannot be applied to the scattered portions of the population affords no reason for omitting to take advantage of it in sections of the country to which it is perfectly adapted.

With careful preparation the great city of New York might be canvassed in a single day, and so thoroughly as to omit hardly a single vagrant or criminal. When this *is* done in a city containing three and a quarter millions of inhabitants, it is idle to assert that any reason exists why it could not be done in a city of less than one million.

DUPLICATIONS IN THE CENSUS.

As an offset, in part, to the wholesale omissions which occur in a protracted enumeration from the causes indicated, there is undoubtedly a certain amount of duplication to be allowed for. The tendency to duplication, indeed, in theory exactly equals the tendency to omission; but there is a practical resistance in the former case, which prevents the names duplicated from reaching anything like the number of the names omitted. Most heads of families will decline being taken twice, and few assistant marshals would insist upon enumerating a family after being told that it had been taken in another subdivision. On the other hand, few heads of families which had been omitted would be at pains to look up the assistant marshal for the purpose of being duly enumerated. The cases where names are duplicated are, therefore, mainly of persons whose connection with families is slight or transient, as casual boarders, habitual travelers, and of persons having, from one cause or another, two distinct homes.

The most noteworthy class in which duplications occur is that of students. In preparation for the Ninth Census this matter received careful attention. By recovering the catalogues of a large number of educational institutions for the year 1859–'60, and searching out the names of students upon the returns both for the college town, and the town of home-residence, as per catalogue, it was ascertained, in a sufficient number of cases to justify a general statement, that a very large proportion of the students of the country were taken twice at the last census. Cases of triplication, even, were found, where the student was reported once at his room in the college building, once in the family where he took his meals, and once at his own family home in another town or State. The following facts, taken at random from a large mass of memoranda on this subject, exhibit fairly the proportions of duplications and triplications, as developed by this inquiry. It needs to be repeated at this point that no students should, under the instructions of 1860, have been reported in the college or school town, except those whose own proper families were resident in the town:

Bowdoin College, Brunswick, Maine.—No students were found in the Brunswick return, except such as appear with families of the same surname.

Amherst College, Amherst, Massachusetts.—Of two hundred and forty-two names of undergraduates contained in the catalogue, one hundred and twenty-five are copied into the return for Amherst in a body, in alphabetical order, by classes.

Of the one hundred and twenty-five, five—four of whom are, according to the catalogue, residents of Amherst—are returned a second time by the same assistant marshal at their homes or boarding-houses as "students."

For the names of nine members of the senior class, who were returned with the body of students by the assistant marshal for Amherst, and whose residences, according to the catalogue, were in other towns, search was made in the returns for those towns. Of the nine, seven were found.

Wesleyan University, Middletown, Connecticut.—None of the names in the catalogue of students were found in the return for Middletown, except such as appear from the catalogue to be residents of Middletown.

Harvard University, Cambridge, Massachusetts.—Twenty-eight students named in the catalogue, whose residences, as therein stated, were elsewhere than at Cambridge, are enumerated as "students" in the Cambridge return, in families of a different surname.

Dartmouth College, Hanover, New Hampshire.—There appears to be no duplication in the return of those students of this college whose residence, according to the catalogue, is at Hanover. Such students appear in the Hanover return with their families, and not with the body of the students. The students who, according to the catalogue, are not residents of Hanover, are, with few exceptions, found in the Hanover return in an alphabetical arrangement by class, as if copied from a catalogue.

Of the senior class, sixty-four in number, fifty-seven are thus returned.

Of the seven not so returned, two resided at Hanover, and were enumerated with the families to which they belonged; three were returned at their homes in other towns; and concerning two it could not readily be determined whether they were so returned or not, their residences, per catalogue, being in States the returns for which were at the Government bindery.

Of the fifty-seven seniors who appear with the mass of students in the Hanover return, it was found that thirty-five were, and eight were not, also included in the enumeration of the towns of their residence, as shown by the catalogue; and of twelve it was not determined whether or not they were twice enumerated, their residences being in towns the returns for which were at the Government bindery.

Search was also made in reference to six members of other classes, and they were found to have been returned both at Hanover and at their homes in other towns.

Wabash College, Crawfordsville, Indiana.—The catalogue contains the names of one hundred and fifty-six students. Sixty-seven persons are consecutively enumerated in the Crawfordsville return as "students;" fifty-six of whom appear also in the catalogue. Of these fifty-six, twenty-two were also enumerated at their homes in other towns and eight of the twenty-two still a third time in their boarding-houses in Crawfordsville.*

In view of these results it was decided to change the instructions in use at the Eighth Census, so as to require students to be reported at their college homes, instead of at their family homes, as in 1860. No assurance was felt that this change would result in reducing the amount of duplication or triplication, but it was thought that the results could not well be worse, and that it might prove that the other plan was the one best adapted to secure a just return. I cannot candidly claim credit on account of the result of this change in instructions. So far as comparison has been made, by the use of college and school catalogues for the year 1870, the instances of duplication and triplication appear in about the same proportion as in 1860. As the instructions given in preparation for the present census were especially emphatic and clear on this subject, it must be inferred that the error is inherent in the nature of a protracted enumeration, and that the remedy can only be found in a *de facto* census.

It has not, of course, been possible to apply a similar test to other classes having an equal or greater liability to duplication, (*i. e.*, casual boarders, habitual travelers, &c.,) but it cannot be doubted, from common observation, that the number thus fictitiously added to the population of the country is considerable.

I desire not to be understood as regarding the duplication resulting from these causes as offsetting the loss by omission in any such sense as to be a matter of congratulation. Every error that occurs in the census of a country, or in any statistical result whatever, is to be regretted as an independent evil, hardly less where it balances

---

* The following extract from a report of the arrangements made for the taking census of 1871, recently published by M. Max Wirth, chief of the federal bureau of statistics, shows that the duplication of the student population in the census is not peculiar to the United States.

"Il s'est rencontré aussi quelques personnes jouissant du droit d'établissement et de séjour en plusieurs arrondissements, des propriétaires et des *étudiants* par exemple. Un certain nombre de *ces derniers* étaient inscrits dans l'endroit où ils faisaient leurs études et dans la localité qu'habitait leur famille."

another error than when it exaggerates the amount of error already existing. Two wrongs no more make a right in mathematics than in morals; and a falsehood in figures is none the more to be tolerated or excused because it may serve to conceal another falsehood.

OTHER DEFECTS OF THE CENSUS LAW.

Supervision by United States marshals.—It would be inexcusable in me to offer objection to the present plan of taking the census through the United States marshals, for any reason that should reflect upon the present incumbents of that office throughout the country, supported as I have been in my work by these officers far beyond what, under the circumstances, it was reasonable to expect of them. The considerations why the marshals of the several judicial districts should not be charged with the superintendence of the census are such as, with their recent experience of the service, must meet their own unanimous assent.

Without dwelling on the several considerations that United States marshals are appointed with reference to their fitness for quite other and separate duties; that the increase of their legitimate business since 1850 has rendered it impossible for them now to give that attention to the work which might once have been expected of them; and that the creation of the internal revenue system and the enactment of the election law have devolved upon them additional obligations still more exacting, until the whole body of their official duties has become so great as to be entirely inconsistent with their devoting an adequate share of their time and effort to an occasional and purely separate and independent work like the census—without dwelling on these considerations, it is sufficient for the settlement of this question that the formation of the judicial districts, to which the United States marshals are severally appointed, is determined by reasons altogether different from those which should determine the formation of census grand divisions.

Southern Florida, with its innumerable reefs and keys, is periodically strewn with wrecks. From the same facts, taken in connection with its proximity to the islands of the Gulf, it affords great facilities for smuggling. For these reasons it is most properly constituted a judicial district, and for that reason, most improperly, it is, by the law of 1850, constituted a census district, with 5,775 inhabitants, enumerated by a single assistant marshal, with a United States marshal to overlook the important operation. Northern New York, with nearly two and a half millions, also constitutes a census district, and its six or seven hundred assistant marshals are all to be instructed and overlooked by one United States marshal. Delaware is a district, so is Massachusetts; Idaho is a district, so is Indiana. It is hardly necessary to say that if superintendence is of any account in census work, the superintendence which is provided by the law of 1850 must be of the least account possible.

The formation of subdivisions.—Here again the census law of 1850 contains a defect of the most serious character, which, so long as it remains unremedied, will always vitiate to no inconsiderable extent the results of a census taken under that law. It is that provision which leaves to the marshals of the several judicial districts the final determination of the census subdivisions, subject only to the proviso that such subdivisions shall not contain exceeding 20,000 inhabitants. This apparent limit is, in fact, no limit whatever, since, even at a protracted enumeration under the present system, subdivisions should never be allowed to exceed 10,000 inhabitants, and only among urban populations should they reach this limit.

The United States marshal, upon the inauguration of a new census, cannot be presumed to have any acquaintance with the requirements of the work, and he will naturally fail to appreciate the difficulties of enumeration for the reason that he has had no experience of them. He will be disposed, for his own convenience, to be charged with the instruction and superintendence of as few assistants as possible, while at the same time the political pressure brought to bear upon him will be in the direction of making large subdivisions, in order to give fortunate applicants as "good a thing" as possible. It is simply a matter of course that under this influence the subdivisions with which the enumeration commences will be far too few, and it will be found necessary in the middle of the work to introduce new and uninstructed assistants to take subdivisions hastily formed not with reference to any reason in the nature of the case, but from the urgent necessities of enumeration. Such has always been and always will be one of the main causes of embarrassment which beset a census taken under the law of 1850. No reason appears why the marshal should be trusted with the final decision of this most important matter. It is not after the analogy of other services, and it is manifestly to the detriment of this service. It is of course proper that each marshal should propose the details of the subdivision of his district, as being better acquainted with its peculiarities of settlement, occupation, &c., but it should be done under authoritative instructions in regard to the maximum of territory and of population; and the entire scheme thus prepared should be submitted for final approval at the Department. In the absence of any right on the part of the Department to direct this matter, it is perfectly idle to suppose that marshals generally will follow the recommendations of the Census Office, looking merely to the efficiency of the

service, against the strong personal and political urgency which dictates a different course. This is not the kind of control which would be trusted in any other department of the public service, and it is not to be expected that it should have any other than an unfortunate effect upon the completion of a work so difficult as the census. As the law stands, the matter of subdivisions is absolutely the business of the marshal. It is in no way the business of the Department, and representations addressed to marshals from the Department upon the subject can receive attention only by courtesy.

The appointment of assistants.—It cannot need to be seriously argued, at this stage of political science, that appointments to the office of assistant marshal should, on every account recognized as of importance in good government, be submitted, for confirmation or rejection, to the Department charged with the conduct and control of the census.

The compensation of assistant marshals.—Another and very important difficulty which was encountered in preparation for the recent census and during its progress, arose from the inadequacy of compensation under the provisions of the act of 1850. From first to last this interfered with the appointment of proper assistants, and still more embarrassed the work of enumeration by rendering assistants desirous of resigning upon the least excuse or none.

The act of May 23, 1850, established the following rates of compensation: For each living inhabitant, 2 cents; for each death reported as having occurred during the year preceding, 2 cents; for each farm, 10 cents; for each establishment of productive industry, (factories, shops, mines, mills, &c.,) 15 cents; for the social statistics of a subdivision or district, 2 per cent. upon the amount paid for the enumeration of the living inhabitants, ($400 for each million of people,) and mileage at 10 cents per mile, the number of miles to be ascertained by multiplying the square root of the number of dwelling-houses by the square root of the number of square miles in the subdivision.

By the first section of the supplementary act of August 30, 1850, it was provided that the Secretary of the Interior should be authorized, at his discretion, to give additional compensation to marshals and assistant marshals "at the Seventh Census of the United States," in California, Oregon, Utah, and New Mexico. The benefit of this provision would, of course, extend equally to all States or Territories formed out of the territory covered by the act. Under this provision, additional compensation, to the extent of 100 per cent., was habitually given to the assistant marshals of the States and Territories named in the act.

It seems to have been assumed, at the Eighth Census of the United States, that this provision of law was still in force, and additional compensation was given to marshals and assistant marshals in those States and Territories, without the question of authority having been raised, so far as appears from the record. In preparing for the present census, the question arose whether this provision was still applicable. As it seemed impossible to maintain such a position for a moment, in view of the terms of the act of August 30, 1850, a communication was addressed to the Department from this office on the 30th day of March, calling attention to the fact that no provision existed for exceptional compensation even in the case of the Pacific States and the Territories; but it was not until the 9th of June, when the time for the commencement of the work had already passed without the marshals of some districts being able to find persons to accept the office of assistant, that additional compensation was authorized, and then only to the extent of 50 per cent. In consequence, the Ninth Census was taken without the advantage of exceptional provision for these outlying regions to even the extent authorized in 1850, although in the interval that had elapsed prices had risen 60 or 80 per cent., while those prices which especially determine the cost of travel, namely, horse-hire and hotel charges, had increased in still greater ratio.

In portions of the country, not named in the act of August 30, 1850, provision was made, by the resolution of June 9, 1870, for additional compensation over the rates of 1850 and 1860, but such provision was expressly limited in terms to subdivisions in which it should be rendered necessary by the "sparseness of the population." The term sparseness of population was, of course, to be loyally interpreted to signify something less than the average of American settlement. To allow such addition in cities or in manufacturing towns, would have been a palpable violation of law, and not less so to extend this provision to thriving agricultural communities.

Such was the only provision for any increase of compensation, even in the most difficult circumstances, over the rates of 1850, at the beginning and through all the course of the enumeration at the Ninth Census. On the 3d of March, 1871, when the census of all the inhabitants of the country, except seventy or eighty thousand, had been completed, Congress authorized the increase of compensation, to the extent of 50 per cent., without respect to density of population, subject to a proviso fixing the maximum amount of compensation per diem. Under this authority such increase has generally been allowed by the Department, involving an expenditure in the neighborhood of $685,000.

The use of this vast sum for this purpose was just and right, and, in a large sense, necessary; but it is greatly to be regretted that the authority to expend it had not been given in advance of the enumeration, rather than when it had been substantially closed. Then it would have been used to improve the character of the census. As it is,

the money has been expended only to relieve hardship. Complaint and dissatisfaction have been remedied; but the census is little the better for it, although the expenditure of so large a sum, had it been authorized in advance, would have sufficed to effect a great improvement in the character of the service.

The main source of all this trouble lies in the fact that the compensation clauses of the act of 1850 are neither theoretically correct nor do they work practical justice. To their theoretical unsoundness we have the highest scientific testimony which can be adduced, namely, that of Professor Benjamin Peirce, Superintendent of the United States Coast Survey, who, after a thorough examination of the mathematical principle which is supposed to underlie this scheme of calculation, has pronounced it to be radically defective and vicious. For its practical injustice, it is sufficient to say that the per diem compensation for field-work to assistant marshals for the census of 1860 ranged from $1 66 to $31 32.

It has been urged that the rates of payment prescribed in the act of 1850 are compensatory in their nature; that, on the one hand, in dense settlements the amount received *per capita* for enumerating inhabitants makes the compensation of the assistant marshal sufficient, while, on the other, in sparsely populated regions the amount paid on account of mileage again sufficiently remunerates the census-taker. This is true in a degree for densely populated districts, and again for regions in the condition of certain of the present Territories of the United States. In cities, where the assistant has only to pass from doorstep to doorstep, the *per capita* compensation will enable a prompt and efficient man, with plausibility enough to quickly gain the confidence of families, and at the same time with a faculty of turning work off rapidly and with little ceremony, to earn from $8 to $12 a day. In certain of the Territories, on the other hand, where the population is altogether in a few important mining districts, or spread along the banks of rivers, it is possible for the marshals to form subdivisions, to which shall be annexed great uninhabited tracts, so that the assistant marshal, while only traveling a few hundred miles, may draw constructive mileage for a hundred thousand, 255,000 square miles forming a single subdivision in 1860. But in regions that lie between these two extremes, in certain of the mining States and Territories for example, where the population is not gathered into nuggets, but sprinkled over the territory like gold through the quartz of their mines, so that the assistant marshal has to visit every part of his subdivision, the possibilities of horseback travel will not allow of a sufficient extent of territory being embraced in one subdivision to yield any considerable sum on account of mileage, while the *per capita* compensation, at 2 cents a head, amounts to little or nothing. In such districts the allowances of the present law will hardly find food for man and beast. In the same way, though in less degree, in ordinary agricultural communities, both West and South, where the farm-houses lie a quarter or half a mile or more apart, all over the subdivision, an assistant marshal must use all his time between daylight and dark, and waste little upon the road, to enable him to earn the barest subsistence under the rates of 1850.

It would be impossible to find language too strong for the embarrassment which the service has suffered from this inadequacy of the provisions of law in respect to compensation. Probably not less than two thousand assistant marshals have been kept from throwing up their positions solely by the fear of incurring the penalty fixed by the fourteenth section of the act of 1850. Before the enumeration had well begun, it became necessary to refuse to accept resignations upon any plea whatever, except in cases of protracted sickness. In some districts a perfect panic arose when the difficulties of the work and the meagerness of the pay became known, and but for a rigid refusal to accept resignations, a general stampede would have occurred, which would have made it simply impossible to carry forward the work.

It need not be said that any service is conducted at enormous disadvantage when it is performed by unwilling agents. If any one will endeavor to conceive the revenue being collected through entire States by officers who are only retained in service through the fear of penalties for resignation, he may form some idea of the obstruction which the census has encountered from this among other causes.

In cases where death or the protracted sickness of an assistant made it absolutely necessary to fill a vacancy, the difficulty of providing for the continuance of the work has been extreme. Some districts have remained for weeks, and even for months, without a person being found of any condition or character who would undertake the duty. In single instances marshals have been obliged to compensate assistants out of their own insufficient fees. In one instance, even, it has come to the knowledge of this office that the marshal of a Southern State, after trying in vain by correspondence to find a single person, black or white, who would accept the office, has been driven to advertise for an assistant in the public prints. It is not at all improbable that this disgraceful incident may have been repeated in other districts.

PRIOR SCHEDULES.

Had not the plan of "prior schedules" formed so prominent a feature of the census bill which at the last session of Congress failed to become law, the use of such schedules would have been introduced in the present census under the general powers conferred by the act of 1850; but in consideration of the fact that this particular provision had encountered so much opposition, it was thought that it would not be a loyal observance of the intention of Congress to introduce a scheme which, had it never been proposed as a legislative provision, might have been introduced unquestioned as a part of the administrative machinery of the census. The experience of the recent enumeration has given fresh illustration of the importance of using this agency in the interest of economy, not to speak of the advantage of securing by means of it a more correct statement in respect to every matter into which the census inquires. The mere saving of time to the assistant marshal would be equivalent to an increase from 10 to 20 per cent. on the rates of compensation authorized by the act of 1850, and to that extent, therefore, would dispense with the necessity now experienced of giving additional compensation. In a few cases, assistant marshals, on their own instance and at their own expense, adopted this scheme in an informal way; and, although schedules thus left at houses without any sanction of law could not be expected to yield as complete results as if made a proper part of the census machinery, yet the success of these efforts was in many cases quite remarkable. To take a single instance: One of the marshals for the city of Covington, Kentucky, reports that he left in advance 3,000 family schedules at the houses of his subdivision, and, upon going around to take them up, found 2,300 satisfactorily filled. The saving of time by this simple means may be judged from the fact that returns of this assistant show that he enumerated a population of nearly 15,000 in 27 working days.

The principal argument for the use of prior schedules, on any right view of the subject, is not, however, found in the saving of time, but in the greater correctness thus given to the enumerations of the census. Under the present system the assistant marshal calls upon families, in the course of his rounds, at hours when the head of the family is generally absent from home. Some, at least, of the inquiries of the census, especially those relating to industry and wealth, are such as but few women are expected to be prepared to answer. The probabilities are, moreover, that in at least one case in six or seven the wife is also absent. The duty of answering inquiries, therefore, often devolves upon servants and children, who are naturally incapable or unprepared to give full and correct answers.

One further remark in regard to prior schedules may not be inappropriate. The main if not the sole objection to their use appears to have arisen from the consideration of the trouble and expense to be involved by the assistant marshal leaving a copy in person with actually every family of his subdivision in advance of the enumeration. In cities and manufacturing towns this might be done without much difficulty, but in rural districts, and especially in the more sparsely settled portions of the country, a preliminary visit of this character would constitute a very serious addition to the duties of the assistant.

The true solution of the difficulty would seem to be found in not requiring the *legal service* of such a paper. By distributing schedules in advance, through personal visitation, in cities and towns, and through the mail, in case of families living at a distance from settlements, four out of five, or even nine out of ten, families could be served in this way without any appreciable addition to the expense; whereas, to require schedules to be distributed in such a way that the assistant marshal should be able to prove in court in every case the service of these papers, would involve an outlay of time and labor which could not be properly compensated without the expenditure of hundreds of thousands of dollars. It would seem that the substantial advantage should be secured without carrying the scheme out to a theoretical completeness. Where schedules should not have been duly received or properly attended to, the assistant marshal would be no worse off with respect to the enumeration of families than before; and even in many of these cases heads of families might casually become acquainted with the character of the inquiries by seeing the schedules in the houses of their neighbors, and be better prepared in consequence to answer promptly and correctly.

THE THIRD SET OF RETURNS.

On the 17th of February, 1870, I had the honor to submit a recommendation that the third set of returns required by the census law of 1850 should be dispensed with, both for the sake of economy and with a view to better protecting the confidential character of the census. This proposition was forwarded to Congress with the recommendation of the Secretary, but the measure failed to become law.

The experiences of the present census have fully justified all the reasons upon which the recommendation was based. The cost of the second copy (making the third set of returns) at the present census, including the cost of the schedules, together with the allowance of 50 per cent. upon this portion of the assistant marshals' compen-

sation, has not amounted to less than $125,000. The whole expenditure has been worse than useless. It has been positively mischievous. The knowledge on the part of the people that the original sheets of the census were to be deposited among the records of the counties to which they relate, has added almost incalculably to the resistance which the inquiries of the census have encountered. It is useless to attempt to maintain the confidential character of a census under such circumstances. The deposit of the returns at the county seat of every county constitutes a direct invitation to impertinent or malicious examination. No proper purpose can be served by this copy of the census returns. All the use to which it can be put must be improper and mischievous. At every step the work of the assistant marshal has been made more difficult by the fear that the information would be used with a view to taxation, or that matters strictly of family and personal interest would be divulged for impertinent and malicious criticism. No one feature of the present method of enumeration has done so much to excite and justify this fear as the provision of the law which requires that the original returns for each county shall be deposited in the office of the county clerk.

At a time when all services are suffering a relentless retrenchment on the ground of economy, it is certainly unfortunate that so large an additional expense should be involved in connection with the census, the whole effect of which is to render more laborious the duty of enumeration, to retard the completion of the work, and seriously to impair the value of its results.

CHANGES IN SCHEDULES.

At previous enumerations considerable changes have been introduced into the schedules as annexed to and made a part of the act of May 23, 1850.

A memorandum of these changes, whether amounting to the introduction of new subject-matter, or being mere variations in form, will be found below.* Into the schedules for use at the Ninth Census the following changes were introduced:

To Schedule No. 1 two inquiries were added, (Nos. 19 and 20,) in compliance with what was believed to be the requirements of the fourteenth amendment to the Constitution. The *first* was intended to obtain the number of male citizens of the United States, in each State, of twenty-one years and upward; the *second*, to obtain the number of such citizens whose right to vote is denied or abridged on other grounds than rebellion or other crime. No anticipations were entertained that the results of these inquiries would be of value for the purpose for which directly they were introduced into the schedule, but it was believed that, in the absence of any legislative provision for determining these two classes of the population, in order to carry out the requirements of the fourteenth amendment, the Department would not be clear if it neglected to make the attempt, it being the only executive organ through which, without such special provision, the information could be obtained, and the present being the only time for ten years when the attempt could be made.

The census is not the proper agency for such an inquiry. The questions of citizenship and of the denial of suffrage to rightful citizens, are mixed questions of law and fact, which an assistant marshal is not competent to decide. No particular value is attributed to the results of these questions, so far as the original object is concerned, but incidentally, it is believed, information of value has been obtained. The count thus required of the total number of male citizens above twenty-one in each State and in the United States, while it perhaps has not authority enough to be used in reducing the representative rights of a sovereign State, has yet been carefully made, and is believed to be as exact as most statistical results. The information is of a kind never before obtained in the country, and has certainly an important bearing upon political philosophy and political history in the United States.

In column 7, in the inquiry "Profession, occupation, or trade of each person, male or female, over fifteen years of age," the limitation of age was stricken out of the schedules, and the limitation of ten years was intro-

---

* *Memorandum of differences between the schedules in use at the censuses of* 1850 *and* 1860, *and the schedules annexed to the census law of* 1850.

Schedule No. 1.—(Free inhabitants.)—The question "Value of personal estate owned" introduced.

Schedule No. 2.—(Slaves.)—The ninth inquiry of this schedule in the act, "Remarks," was omitted from the schedule of 1850, and became "No. of slave-houses" on the schedule of 1860.

Schedule No. 3.—(Agriculture.)—The question "Other prepared hemp" inserted. This by virtue of twenty-seventh section of act approved May 23, 1850. Question No. 45, "Honey and beeswax," in the law, branched on the schedule of 1860 as questions 45 and 46.

Schedule No. 4.—(Manufactures.)—No change.

Schedule No. 5.—(Social statistics.)—The questions "No. of teachers" and "No. of pupils" introduced; also, "Amount annually realized from endowment." The question "Value of churches" in the law, became "Value of church property" on the schedule. The inquiry "Denomination" introduced. The inquiry of the law "Whole number of paupers supported *within the year*" was divided on the schedule as "Native" and "Foreign," whereas this distinction in the law only extended to "Whole number on 1*st of June*." The same of "No. convicted of crime *during year*." The distinction, twice required in the law, between paupers and criminals, as "white" or "black," was omitted from the schedules.

Schedule No. 6.—(Mortality.)—The inquiry "No. of days ill" introduced on the schedules.

42596

duced into the instructions to assistant marshals. It was believed that this inquiry ought to extend as nearly as possible to the whole body of persons of both sexes and all ages pursuing gainful occupations in the United States.

After the inquiry "Place of birth," (column 10 of the law and of previous schedules,) two columns were added for an affirmative mark against the name of each person whose father or whose mother was of foreign birth. It is a matter of regret that it was not practicable to give space in these columns for the particular State or country of the foreign birth of parents. The importance of the tables which distribute our foreign-born population among the several nations of the Old World have always been fully appreciated by our people; but it would be of even greater value to ascertain the contributions made to our *native* population by each principal country of Europe; to obtain, in addition to the number born in England, in Ireland, in Germany, in Sweden, or in Denmark, the number of those who are Irish, English, Germans, Swedes, or Danes by only one remove.

Inasmuch, however, as the typographical possibilities of a single-paged schedule would not allow of the introduction of so much matter, the inquiries of the census in this direction were limited to obtaining the total number having father or mother of foreign birth. It is believed that no more important addition could be made to the schedule of inhabitants. This part of the work appears to have been, in general, very well done by the assistants, and the results as found in Table IV of the present volume are both instructive and surprising.

Two other changes were introduced experimentally into this schedule.

The inquiry which appears in the census law of 1850, "Married within the year," was altered to read "If married within the year, state the month;" and a column was introduced with the heading, "If born within the year, state the month."

These two changes were introduced for the purpose of making our statistics comparable with those of many European countries, which give the month for the three capital events of life—birth, marriage, and death. Provision had already been made for obtaining the month of death through the mortality schedule.

The first change mentioned has had no valuable result, for the simple reason that the return of marriages on Schedule No. 1 was ludicrously short of the known facts of every community in the land. Such had been the case heretofore in the census: but hopes were entertained that, by strenuous instructions to assistant marshals, this defect might be remedied, and even the additional information desired be secured. The experience of this census, however, as of the censuses of 1850 and 1860, has shown that the statistics of this subject are only to be collected through a permanent registration and under a system of penalties.

The direct result of the effort to obtain the month of birth for all children born within the census year, has been to secure statistics on this subject which are of a high degree of value for nine months of the year, and exhibit with great accuracy the varying influence of the seasons upon human reproduction in each section of the Union.

Of even greater value, perhaps, is the indirect and generally unexpected result of this inquiry, namely, the explanation that has been afforded, through it, of the inadequacy of the return made at all previous censuses, of children under one year of age.

It may be known to many persons besides those commonly interested in such abstruse calculations, that the controversy as to the proportion of our population which is of original native stock, has turned very much on the determination of the number of persons born during a year in the United States, as the same is indicated by the number surviving at the end of the year.

Besides making the almost inconceivable blunder of overlooking, in such calculations, the infants dying during the year of the census, some of our most pretentious writers on the subject of population have based their disparaging conclusions as to the vigor of our pure American stock, in contrast with that of the several foreign elements, upon the statements of previous censuses as to the number "under one year."

It has been manifest, however, to those who took pains to look below the surface, that the number of this class was, for some reason, inadequately represented. Dr. Jarvis, of Dorchester, Massachusetts, a writer of great accuracy on these subjects, has advanced the explanation that infants of such tender age are to a considerable extent overlooked in the enumeration. But most heads of families will agree that "the baby" in the house is generally the last member of the household to be forgotten; and that such omissions are far more likely to occur in respect to children absent at school or in trade.

I have for some time held the opinion that the inadequate representation of persons under one year of age was due to the tendency to speak of infants of between eleven and twelve months, and even between ten and eleven months, as a year old, and that, therefore, the defect complained of did not result from the omission of names from the schedules, but from erroneous classification. The result of the inquiry has been to substantiate this view most strikingly, and, while explaining the inadequacy of the return of children under one year at this and previous censuses, to furnish ample material for correcting and completing the statement.

It is proposed to include the table which presents these results for each State and Territory in the volume

devoted to the vital statistics of the country, and that table has not, therefore, undergone its final revision for publication; but a few instances taken at random will suffice to indicate the general character of the whole. It will be seen at a glance that the respective numbers of births in the several months vary for nine months only so much as should be expected under the influence of physical causes; but that in the tenth month a very perceptible disturbance is introduced, while in the eleventh and twelfth months (counting backward from the date of enumeration) the number of births fall off with extraordinary rapidity, almost to zero.

BIRTH TABLE.

To resume: The "Illiteracy" column of the schedule of 1850, "Persons over twenty years of age who cannot read or write," branched upon the schedule of 1870 into two columns, "Cannot read" and "Cannot write."

This addition to the statistics of illiteracy is believed to be of capital importance. The reason for such a division of the subject is real and palpable. It is not, however, strictly an addition to the inquiries of the census, inasmuch as to meet the requirements of the schedules of 1850 and 1860 the assistant marshal was, in fact, obliged to ask both questions. The answers were, however, required to be separately recorded upon the schedule of 1870.

It is well known that great numbers of persons, rather than admit their ignorance, will claim to read, who will not pretend that they can write. No matter how limited their acquirements, the assistant marshal will not get them to confess that they cannot read, provided they have any possible ground for claiming such an accomplishment. All, however, who have had to do with soldiers, or with workmen in gangs, know that no such sensitiveness, at least in any such degree, exists in regard to writing. There is much more readiness and frankness in acknowledging a deficiency in this respect.

But if a man cannot write, it is fair to assume that he cannot read well; that is, that he really comes within the illiterate class, whose numbers it is of peculiar importance to ascertain at the present time. The distinction has been fully justified in the result. Taking the whole country together, hundreds of thousands of persons appear in the class "Cannot write," over and above those who confess that they cannot read. This is the true number of the illiterate of the country: the class which it is now necessary to treat, for the simple safety of our political institutions.

The limitation of age, moreover, incorporated in the schedule annexed to the act of 1850, has been modified so as to bring within the scope of this inquiry all persons above ten years of age.

The reason for this enlargement seems to be such as to justify the change. Previous censuses have obtained the number of illiterate over twenty. These are the hopelessly illiterate, of whose enlightenment no reasonable expectation can be entertained. But those at present between the ages of ten and fifteen, and between fifteen and twenty, who cannot read and write, are to constitute the class which in ten years more, but for exertions now to be put forth, will form the hopelessly illiterate of another census. It is clearly as important to determine the numbers of our youth who are growing up in ignorance, and who may yet be brought within the reach of instruction, as to determine the number of those who have passed the period of youth in ignorance, and who will, with few exceptions, remain illiterate through life.

The inquiry of 1850 and 1860, "Whether deaf, dumb, blind, insane, idiotic, pauper, or convict," was modified in the schedules of 1870 by striking out the two latter classes as offensive and superfluous. The number of both these classes is obtained with far more accuracy by inquiries on Schedule No. 5, "Social statistics."

To the "Mortality schedule," (No. 3 of the Eighth Census, No. 2 of the Ninth Census, the "Slave schedule" being omitted,) a column was added for the number of the family in which the death occurred, as the same appeared on Schedule No. 1. This, however, did not constitute one of the inquiries of the census, but was intended to afford a means of easy reference from one schedule to the other, for purposes of verification or of further inquiry, should such become necessary. The inquiry, "Free or slave," of 1850 and 1860 was omitted, as a matter of course, from the schedule of 1870. Two columns for an affirmative mark against the name of each person whose father or whose

mother was of foreign birth were introduced into this schedule, to correspond with the same on Schedule No. 1. The inquiry upon the schedules of 1850 and 1860, "Number of days ill," was omitted, as of no conceivable importance. This inquiry is not contained in the schedule annexed to the law of 1850.

The inquiry upon the Agricultural schedule previously in use, "Acres of unimproved land," was divided on the schedules of 1870 into "Acres of woodland" and "Acres of other unimproved land." A column was added for the inquiry, "Total amount of wages paid during the year, including value of board." The inquiry, "Bushels of wheat raised" in 1850, was divided in 1870 as "Bushels of spring wheat," "Bushels of winter wheat." Under the head of "Dairy products" was added the inquiry, "Amount of milk sold."

Upon the schedules of 1850 and 1860 "Hemp raised" occupied three columns, "Dew-rotted," "Water-rotted," and "Other prepared hemp." As hemp is, speaking generally, prepared in only one way at the present time in the United States, this crop was limited to a single column in the schedules of 1870; and assistant marshals were instructed, if they had occasion to report hemp prepared in other ways, to indicate the distinction by a note. A column for the "Value of forest products, including wood, lumber, staves, poles, &c.," was added to the schedule of 1870. To the inquiry of 1850 and 1860, "Value of animals slaughtered," upon the schedule of 1870 were added the words "or sold for slaughter."

By far the most important addition to this schedule was the inquiry, "Total value of farm productions during the year." The difficulty which statisticians have experienced in getting anything like a correct total valuation of the agricultural production of the country has been the reason for this inquiry. So long as well-informed men can dispute whether the farm production of the country reaches two thousand or four thousand million dollars, it would seem desirable that an effort should be made to introduce somewhat more of certainty into the subject. The country would not be satisfied for a moment if the column "Total production" was stricken from the Manufacturing schedule, and statisticians were left to estimate the aggregate of the manufacturing industry of the country from fragmentary information in regard to the quantities of different articles reported as produced during a single year.

Upon the Manufacturing schedule the inquiry of the law, "Kind of motive power, machinery, structure, or resource," was developed into inquiries occupying four columns of the schedule of 1870, namely:

1st, "Kind of motive power," (steam, water, wind, horse, or hand;) 2d, "If steam or water, number of horse-power;" 3d and 4th, "Name" and "number" of machines used.

This change, however, is a purely formal one, as the instructions of 1860 required all these facts to be obtained, although, as was inevitable from the attempt to compress so much and such diverse material within a single column, in effect none of the information was secured with sufficient distinctness and completeness to allow of its publication, and the whole was therefore lost. The result of the division of these inquiries at the Ninth Census has been to secure full and reliable material, for the first time, for a report of the steam and water power of the country employed in manufactures. Except a careful report for the State of Rhode Island, and a report more or less accurate for the city of Philadelphia, I am not aware that any statistics of this kind have ever been prepared in the United States. The information in regard to the machinery used in the cotton, wool, iron, and other important industries, and in regard to the capacity of the grist and flouring establishments of the United States, has also been obtained with fullness and accuracy.

The inquiry of 1850 and 1860, "Average number of hands employed—male, female," was modified in the schedule of 1870 to read "Average number of hands employed—males above sixteen, females above fifteen, children and youth." For the inquiries upon the schedule of 1850 and 1860 in regard to "wages," namely, "Average monthly cost of male labor," "Average monthly cost of female labor," was substituted, on the schedule of 1870, a single inquiry, "Total amount of wages paid during the year."

Inasmuch as the phraseology of this schedule, as annexed to the act of 1850, and as used in the censuses of 1850 and 1860, viz: "Producing *articles* to the value of $500," was often understood to imply that the inquiry should be limited to establishments producing separate and distinct articles, such, mainly, as could be done up in parcels, sold across a counter, and carried off in the pocket, and as such a limitation would be in the highest degree mischievous and absurd, the word "articles" was stricken from the heading of the schedule of 1870.

The schedule for "Social statistics," as annexed to the act of 1850, contained ten general heads, Valuation, Taxation, Education, Religion, Libraries, Newspapers and Periodicals, Pauperism, Crime, Wages, Seasons and Crops. The last of these was stricken from the schedule of 1870, for the reasons that it has always been valueless in its results, and that the information which it was intended to obtain is now secured through the Department of Agriculture. The place of this inquiry was supplied by an inquiry into the "Public debt" of towns, cities, counties, and States, as the proper complement of the inquiries relating to valuation and taxation, and as being of great importance at the present time to the public credit.

Fewer changes in subject-matter were introduced into this schedule at the present than at previous censuses. The distinction of "Paupers" and of "Criminals" as "Native white," "Native black," which was omitted from the schedules of 1850 and 1860, was restored in 1870, to follow the form of the schedule as annexed to the law. Under the head of "Religion," the inquiry "Number of churches" being ambiguous, two columns were used in 1870, "Number of church organizations," "Number of church edifices." Under the head of "Education" the inquiries "Number of teachers" and "Number of pupils" were subdivided to read "Number of males," "Number of females."

A decided difference of *form*, however, was introduced into the schedule. For example, under the general head of "Education," the schedule of 1850 required to be stated the "Kinds of colleges, academies, or schools," leaving assistant marshals to make a classification of educational institutions for themselves.

An example of the inevitable confusion consequent upon an attempt to collect statistics according to this method will be found both instructive and amusing. From the returns on Schedule No. 5, for the States of Virginia, Vermont, and a portion of Pennsylvania, is gathered at random the following extensive list of specifications:

Academy; classical academy; academy for males; academy for females; academy for males and females; boarding-school; boarding-school for ladies; boys' grammar school; boys' primary school; classical school; college; common school; common school for males; common school for females; common schools mixed; commercial school; commercial and military institute; colored public school; corporation school; collegiate institute; charity school; day-school; district school; elementary school; elementary and classical school; English school; family school; Friends' school; free school; female seminary; female institute; female college; graded school; grammar school; high school; institution of learning; independent school; music school; military institute; normal school; pay school; parochial school; public school; private school; primary school; select school; State school; secondary school; subscription school; seminary; theological seminary; unclassified; ungraded; university.

Under the same system of allowing assistant marshals to furnish their own classification, the following are given as the "Kinds of taxation" in the same States:

Borough; bridges; capitation; corporation; county; county levy; city; district school; education; fees and income; ferries; gas; highway; income; land; licenses; literary fund; militia; office fees; ordinaries; parish; parish levy; personal; property; poor; road; real estate; school; State school; State revenue; State; stores; stallion; slaves; town; village; and water.

If any one will attempt to classify these "kinds of taxation," upon any known or imaginary system, either, first, according to the objects on which the taxes are imposed; or, second, the authority imposing the taxes; or, third, the purposes to which the proceeds are to be applied, he will realize the importance of furnishing assistant marshals with a classification in advance, to which they shall be required to adhere in their returns of such matters.

Indeed, a glance at this list will show the utter impossibility of reducing such specifications to anything like a consistent scheme. The information might just as well not be given at all as be given in this manner.

In view of this palpable difficulty, the schedule of 1870 contained a classification under each of the three general heads of "Schools," "Taxes," and "Libraries," for the government of assistant marshals in their returns.

SPECIAL ADMINISTRATIVE EFFORTS AT THE NINTH CENSUS.

Apart from the rearrangement of the schedules and the adjustment of the stated inquiries to meet new or altered social or economical conditions in the public body, it is only in certain respects that the census, under the limited powers conferred by the act of 1850, even when construed and employed most liberally, can be improved by administration at the Census Office. Whether the enumeration shall omit a larger or a smaller number of inhabitants than at preceding censuses, is determined almost wholly by the changes that may have taken place in the social conditions of the people, and by the accidental character of the appointments to the office of United States marshal, the country over, at the time. If, by reason of improved facilities for travel, and the greater restlessness of our population, an increasing number escape enumeration at each successive census, it is a matter over which the Census Office, as at present constituted, has little control. If, on the other hand, by reason of the low grade of appointments to the offices, both of marshal and of assistant marshal, the work of enumeration should be more negligently performed, for this, again, neither the Department nor the Office should be held responsible, as they have no control over the matter of appointments.

Moreover, many of the inquiries of the census are of a character to require no explanation, and admit of only a categorical answer. It becomes, therefore, merely a question of honesty and ordinary intelligence on the part of individual enumerators whether these parts of the work be properly performed or not.

There are, however, certain points in which the value of the census must depend very greatly upon the instructions issued, and upon the arrangements made in advance of the enumeration. These may be specified as follows:

First.—The return of "Occupations" on Schedule No. 1. Whether the industrial or the social character of a nation be considered, a true return of the occupations of the people constitutes the most important single feature of the census. It would be impossible so thoroughly to gather the productions of industry in all its branches,

even under the most improved provisions of law, as to present a view of the industrial capacity of the country as justly and completely as would be obtained from a perfect representation of the employments of the whole body of inhabitants. Even were provision to be made by law for enumerating the great interests of trade and transportation, in addition to those of agriculture and manufactures, which alone are provided for, there would still remain a vast body of production, in the form of professional and personal services, which the schedules of the census could not pretend to cover, while at the same time no small measure of the industries which were professedly embraced in the enumeration would unavoidably escape observation.

The social value of such statistics is even greater. The habits of a people, their social tastes, and moral standards, would be more truthfully depicted in a complete list of their daily occupations, than ever was done in any book of travels or of history. Next to the actual count of living inhabitants, for the purpose of distributing representation, the most important single inquiry of the census is in regard to the occupations of the people.

It has been common to assume that the difficulties which beset a truthful return of occupations are inherent and ineradicable. I have never seen any reason for accepting such a view. It is not asserted that these difficulties arise from the reluctance or the ignorance of the people. It must be, then, from the unfitness of enumerators generally to report occupations according to any scientific or satisfactory classification, or it is from the want of clear and definite instructions on the subject.

In the present census unusual attention has been bestowed upon this inquiry. The object aimed at was to prevent the use on the returns of those general and unmeaning terms which have hitherto embarrassed the work of compilation, and which will always occur in profusion where special efforts are not directed to the single end of securing correct and intelligible reports of occupations.*

In the census of 1860 the occurrence of these vague and unsatisfactory terms was so frequent that the utmost efforts in compilation could not have succeeded in removing tens of thousands of cases where, from the specification of the occupation, it was impossible to judge to which of the great branches of industry—manufactures, agriculture, mining, commerce, or professional life—the person reported belonged; or to avoid tens of thousands more where, the great branch of industry being determined, it was entirely impossible to say to which of its principal departments he should be assigned.

The result of the efforts made to improve this portion of the returns has been eminently satisfactory, and it is believed that the tables of occupation, when fully prepared, will afford a view of the employments of the people of exceptional interest and value.

Second.—Another point in which the returns of the census may be materially affected by the character of the definitions and instructions issued, and by the urgency with which such instructions are impressed upon the minds of assistant marshals, is in respect to the statement of diseases and other "Causes of death," upon the Mortality

---

* The following extracts from the "Pamphlet of Instructions" will serve to show more specifically the kind of errors which it was desired to avoid:

OCCUPATION.—The inquiry "Profession, occupation, or trade," is one of the most important questions of this schedule. Make a study of it. Take especial pains to avoid unmeaning terms, or such as are too general to convey a definite idea of the occupation. Call no man a "factory hand" or a "mill operative." State the kind of a mill or factory. The better form of expression would be "works in cotton mill,' "works in paper mill," &c.

Do not apply the word "jeweler" to those who make watches, watch chains, or jewelry, in large manufacturing establishments.

Call no man a "commissioner," a "collector," an "agent," an "artist," an "overseer," a "professor," a "treasurer," a "contractor," or a "speculator," without further explanation.

When boys are entered as apprentices, state the trade they are apprenticed to, as, "apprenticed to a carpenter," "apothecary's apprentice."

When clerks are returned, describe them as "clerk in store," "clerk in woolen mill," "railroad clerk," "bank clerk," &c.

Describe no man as a "mechanic" if it is possible to describe him more accurately. * * *

Be very particular to distinguish between farmers and farm laborers. In agricultural regions this should be one of the points to which the assistant marshal should especially direct his attention.

Judges (state whether federal or State, whether probate, police, or otherwise) may be assumed to be lawyers, and that addition, therefore, need not be given, but all other *officials* should have their profession designated, if they have any, as "retired merchant, governor of Massachusetts," "paper manufacturer, representative in legislature." If anything is to be omitted, leave out the office and put in the occupation.

The organization of domestic service has not proceeded so far in this country as to render it worth while to make distinction in the character of work. Report all as "domestic servants."

Cooks, waiters, &c., in hotels and restaurants, will be reported separately from domestic servants.

The term "housekeeper" will be reserved for such persons as receive distinct wages or salary for the service. * * *

You are under no obligation to give any man's occupation just as he expresses it. If he cannot tell intelligibly what he *is*, find out what he *does*, and characterize his profession accordingly.

The inquiry as to occupation will not be asked in respect to infants or children too young to take any part in production. Neither will the doing of domestic errands or family chores out of school be considered an occupation. "At home" or "attending school" will be the best entry in the majority of cases; but if a boy or girl, whatever the age, is earning money regularly by labor, contributing to the family support or appreciably assisting in mechanical or agricultural industry, the occupation should be stated.

schedule. The difficulties which encumber this subject are far more serious than those which belong to the return of occupations, but, in a degree, they also allow of removal or abatement, by means of greater clearness and positiveness in the matter of instructions, and by the use of auxiliary agencies, such as are usually at the command of assistant marshals. If we examine the tables of mortality at preceding censuses, we find, as in the case of occupations, a vast number of pretended specifications, which are no specifications at all, it being impossible in no small number of cases, after the cause of death is stated, to determine what the man died for or what he died of, the origin, seat, and type of the disease being all equally doubtful. It is, of course, inevitable that there shall be a large number of cases reported where the cause of death cannot be satisfactorily determined, but this is only where the difficulty has resulted from the mysterious nature of the disease, or from the absence of persons sufficiently well informed to characterize it. Such, however, constitute not one-third, possibly not one-fifth, of the cases where the actual returns of the census have in the past been vague or ambiguous. It is not generally because the family are not able to give the information, but it is because the enumerator is not sufficiently intelligent or well-advised to elicit the facts and to express them to the comprehension of others, that so large a proportion of the causes of death, as stated upon the schedules of mortality, are impossible or absurd.

Two methods have been adopted for remedying this defect at the present enumeration. Urgent instructions at length were given to assistant marshals in advance, to report the cause of death as minutely and specifically as possible; and in this connection all erroneous or insufficient denominations, to which a liability had been shown at previous enumerations, were indicated, and assistants warned against their use. At the same time assistant marshals were directed, wherever it should be found practicable, to submit their schedules of mortality to the physician of the neighborhood or village, with a view to having deficiencies supplied and errors corrected. So simple a provision, it was believed, would be sufficient to cure a great part of the defects of the enumeration.

The unknown causes of death returned at the present census aggregate but 17,266, being 3.67 per cent. of the total deaths, not violent, reported. The unknown causes of death returned in 1860 were 36,707, being 9.81 per cent. of the total deaths not violent.

But this comparison does not express the full measure of the improvement in these statistics which it has been found possible to effect by such administrative efforts as have here been indicated. The tables of mortality at the Eighth Census contain many thousands of deaths to which causes are assigned which afford neither a popular nor a scientific explanation of the fact of death. For example, hemorrhage is returned as a cause of death in 1,321 instances. Yet from such a statement it cannot even be determined whether the death was violent or not; nor, if death *not* violent, what was the origin, the seat, or the type of the disease. The death might have been from hemorrhage of the bowels, or of the brain, or of the lungs, or it might have been from a gunshot wound, or through an injury from machinery. The probabilities are that the greater portion of these deaths should have been returned as from consumption, but it is not possible to determine what proportion of the total should have been so returned, much less to distribute such deaths between the two sexes, among the several periods of life, or among the months of the year.

With a similar looseness, 6,234 persons are reported as having died of "infantile diseases." Now, to say that an infant dies of an infantile disease amounts to no more than to say that an adult dies of an adult disease. All such insufficient specifications have been merged in the "unknown" of 1870. For comparison, therefore, the unknown of 1860 should be enlarged by the addition of at least the following classes: "hemorrhage," 1,321; "infantile diseases," 6,234; "inflammation," 1,326; "sudden death," 816; "cold water," 5, making a total "true unknown" for that census of 46,409, being 12.40 per cent. of the total deaths not violent.

The following table exhibits the distribution of the unknown causes of death for the two censuses among the States and Territories:

STATES AND TERRITORIES.	1860.									1870.		
	Unknown.	Cold water.	Hemorrhage.	Infantile.	Inflammation.	Sudden death.	True unknown.	Total deaths not violent.	Per cent. of unknown.	Unknown.	Total deaths not violent.	Per cent. of unknown.

† The per cent. of unknown for Virginia and West Virginia is 7.68.

Third. Another important point in which the value of the returns of the census will greatly depend upon the character of instructions given, is in respect to the "kinds and quantities," both of materials consumed and of the resulting products, upon the manufacturing schedule. The difficulty is one that ought not to exist, since it might be wholly avoided by the use of schedules special to each important industry of the country. In the absence of any such provision, the returns of manufactures, upon the schedule annexed to the act of 1850, are liable to become so confused, in respect to the statement of "kinds and quantities," as to render it practically impossible to tabulate the results. So considerable is this difficulty, that out of more than one hundred and forty thousand establishments of productive industry reported upon this schedule in 1860, from all of which statements were *required* of kinds and quantities,

both of materials and products, it was found possible to tabulate only about five per cent.,* according to kinds and quantities, and of this list scarcely any portion exhibited the information with a satisfactory degree of fullness.

The difficulty of tabulation under such a plan arises generally not from the want of a sufficient number of specifications, but from the fact that the specifications, in regard to each industry, are made by hundreds or thousands of proprietors of establishments, none of whom are advised with what degree of minuteness or according to what classification, it is desired to have the materials and products reported. As a consequence many will be at pains to report with far more particularity and minuteness than is desirable, while others will report with less than is essential.

The reduction of such irregular specifications to anything like a common system is impossible, so that not only is the particular information required lost, but the manufacturers of the country are put to very great trouble and inconvenience for nothing.

The methods adopted at the present census, in dealing with the subject, were as follows: In the first place, somewhat more than one-half the proprietors of productive establishments were by instructions relieved from the trouble of returning "kinds and quantities." All whose materials and products were "of a minor and miscellaneous character," where the statement of kinds and quantities could not possibly be of use, were excused from returning this information. Secondly, by a mechanical adaptation, the schedules of 1850 and 1860, without the addition or alteration of a letter or figure, were made to secure a portion of the advantages in this respect belonging to special schedules. Thirdly, the instructions to assistant marshals contained a distinct classification of the materials and of the articles of production which it was desired to have reported in the case of each important industry. Such a classification, it was believed, would save proprietors of establishments and assistant marshals much delay and vexation in deciding with what degree of fullness, and according to what specification, to report; and would also render such reports of value when made.

The result of these efforts has been to secure so much improvement in this particular, as to insure that from eighty to one hundred thousand manufacturing establishments will be tabulated with all the fullness of information, in respect to materials, machinery, and production, which could be desired. The information thus obtained is not only important in itself, but is, at the present time, exceptionally desirable, on account of the disturbance of values and the exaggeration of prices.

Fourth. Still another noticeable administrative feature of the recent census, has been the appointment of special deputy marshals in a majority of districts for the collection of the "social statistics," so called, upon Schedule No. 5.

The collection of these statistics is, by the law of 1850, made an exception to the rules which govern in respect to the other schedules.

All the materials for Schedules Nos. 1, 2, 3, and 4, must be obtained by the personal inquiry of the assistant marshal at each house, farm, shop, &c., of his subdivision. The social statistics, on the other hand, are of a character to be obtained largely from official documents, from the public reports or manuscript records of schools, colleges, prisons, poor-houses, asylums, &c.

The seventh section of the act of May 23, 1850, therefore provides that marshals may at their discretion appoint "deputies" for the collection of the social statistics, and that such appointments shall not be deemed an interference with the duties of assistant marshals.

Notwithstanding this provision of the law, it does not appear that such deputies were in any case appointed at preceding censuses, except for single cities or counties, the person commissioned to collect the statistics of the entire city or county being commonly one of the regular assistants.

The section authorizing the appointment of special deputies for the collection of social statistics, appears to be one of the best provisions of the act of 1850; and special efforts were made in preparation for the Ninth Census to induce marshals to appoint such deputies in all States which should be found highly organized enough to admit of

the collection of their statistics through such central agencies. The attention of marshals was especially invited to the importance of securing for this work men of known interest in and aptitude for such inquiries, in order that the results might be presented in a manner creditable to the several States and cities. It was also announced that, in case it should be desired to have the social statistics of any State which is divided into two or more judicial districts taken as a whole, and the marshals for the several districts of the State should to that end concur in issuing commissions to the same person, such an appointment would be recognized by the Department as in substantial compliance with the law of 1850.

In consequence of these efforts special deputies were appointed in a majority of the States, either for the entire State or for important sections. In several instances gentlemen of national reputation were induced to accept the appointment of deputy marshal, from a scientific interest in the results, or from a wish to see their States properly represented in the census. In some States, however, mainly at the South, where much of the interior organization was overthrown by the war, it was not deemed practicable to collect the social statistics in this way, and the duty was therefore charged, as heretofore, upon the regular assistants.

The result of these special efforts in the direction of the social statistics of the country, has been to secure statements of a high degree of completeness and accuracy from somewhat more than half the States of the Union, in respect to their wealth, debt, and taxation; their public pauperism and crime; their church organizations and edifices; their academies, colleges, and schools; their newspapers and periodicals. For the results in respect to libraries and wages, not much can be said. In the remaining States the statistics of the classes first named have, after the most laborious correspondence, been worked up into something like an approximation to the truth. The total result, in respect to eight of the classes embraced on the "Social statistics" schedule, is to enable the office to prepare tables which, taking the whole country together, are unquestionably well worth publishing, provided they be accompanied by the proper exceptions and explanations in respect to deficiencies known to exist.

This frank admission should not prejudice the publications of the present census in comparison with those of preceding censuses, or with official documents emanating from any other source. These portions of the statistics of the census have never been more completely or correctly taken, and where deficiencies are acknowledged, it is because the information is not to be obtained by agencies at present in existence.

In no part of the census service is the inadequacy of compensation so severely felt as in the collection of the social statistics. The Government pays something like $24,000 for the work in all the States of the Union, while the information could not be satisfactorily collected as a matter of business for less than $200,000.

COMPILATION OF RESULTS.

In the compilations of the present census, it has been invariably held to be a desirable thing to retain the forms and molds of preceding census publications, in order to make comparison practicable. The only cases where departure from this rule has been allowed in any particular, are those in which the specifications or classifications of previous publications have been thought to be essentially vicious, and therefore more to be honored in the breach than in the observance. Where inadequacy merely has been complained of, the effort has been made to introduce new divisions or new groupings, while retaining the old so far as to allow comparison to be made with former results, as notably in the tabulation of the ages of the living population.

While preserving the comparative character of those tables which correspond to the several tables published in 1850 and 1860, large additions have been made to the number of tables published, for the purpose of more completely presenting the information obtained in the enumeration; while the tables which correspond in general to those of former publications, have been enlarged at a very considerable expense of clerical labor. I have not felt the least hesitation in undertaking any compilation, no matter how extended, which promised results that could be useful to any considerable class of the community, or which had a clear scientific value. The census of this country is not taken so often, nor is the statistical information at the command of our people so ample, that we can afford to throw away any part of the material for want of a complete compilation. Especially, since it costs so heavily to bring this material into the Census Office, would it be the falsest of all false economy to lose any portion of it which, when tested, is found to be trustworthy, for the sake of effecting a saving in the cost of tabulation. All that could be done to reduce the expense of these additional undertakings in the Census Office, by fixing a high standard of clerical efficiency, and exacting the utmost of daily performance that could justly be required of the clerks of the office, has been done. Whatever, in spite of this, has been added to the cost of the census through this increase in the number and this enlargement of the scope of the tables accompanying, must be justified, if at all, by the value of the statistics in the interest of science, industry, and good legislation.

Ages. The classification of the ages of living inhabitants adopted in the compilations of 1860, was as follows;

Under 1, 1 to 5; 5 to 10; 10 to 15; 15 to 20; 20 to 30; 30 to 40; 40 to 50; 50 to 60; 60 to 70; 70 to 80; 80 to 90; 90 to 100; each year above 100 being specified. The most evident criticisms upon this classification are as follows: The period 1 to 5 is too long, both from the great number to be reported in that class, and from the fact that the conditions of life change to an important degree with each year under 5. A minuter subdivision ought to be made. Especially is this true with a view to computing, for any scientific purpose, the number of survivors from this class at any time during the interval between two censuses. Secondly, decennial periods are too extensive to allow of anything like nicety of calculation. Quinquennial periods have been adopted for the compilations of the present census. Thirdly, it may seem very strange, when it is considered that one of the principal objects of the census from the earliest times, in all countries, has been to ascertain the military strength of the people, that the period at which the military age begins has never thus far been obtained in the United States. It is difficult to conceive of any species of information which can, from a practical point of view, have precedence in a census over the determination of the number of males between 18 and 45. Fourthly, compilations of preceding censuses have totally disregarded another fact of the highest value, namely, the number of males in the country above the age of 21 years. If any information in regard to the number of persons, according to age, might be supposed to be of interest to the political philosopher, it is the number of persons of voting age. Fifthly, there is quite as much reason for obtaining the number of persons who are above 80 *by single years*, as for obtaining the number above 100 by single years. It cannot be questioned that the additional information would be of great use, not merely in calculations purely scientific, but in computing the expectation of life with reference to life annuities and life insurance.

In fact, this whole matter of decennial periods for the tabulation of ages exhibits a singular disregard of the proper objects of statistical inquiry under a government like ours. The decimal system may be a very good one to introduce into coinage and to govern weights and measures, but it means nothing when applied to the important events of human life. Twenty years means nothing more than any other period; but eighteen years, the age at which a man enters the militia of his country; twenty-one years, the age at which a man becomes a voter in every State of the Union; these periods do mean something, and hold important relations to political science.

At the same time, while introducing new specifications of age into the compilation of the present census, for the reasons presented above, care has been taken to keep up the comparative character of the Ninth Census. In accordance with this principle the age of twenty years has been introduced into the tables, not because it is of any importance in itself more than any other single year, but in order to enable comparison to be made between this class at the present and at preceding censuses.

In view of the consideration presented above, the following classification of ages has been adopted in the compilations of the present census: Under 1; 1; 2; 3; 4; 5 to 10; 10 to 15; 15 to 18; 18 to 20; 21; 21 to 25; 25 to 30; 30 to 35; 35 to 40; 40 to 45; 45 to 50; 50 to 55; 55 to 60; 60 to 65; 65 to 70; 70 to 75; 75 to 80; 80; 81; 82; 83; and upward, by single years.

Another most important distinction which has been introduced into the tabulation of results, is the distinction between native and foreign-born in the tables of age and sex. This distinction involves no inconsiderable addition to the work of preparing these tables, but it is exceedingly desirable. From the table of the native population by age and sex, we shall be able to see how the various conditions of life in the United States affect the duration of life to those who are born here and grow up through their childhood under the influence of our soil and climate. From the table of the foreign-born population, we shall see how those who have derived their original constitution from foreign stock, and have grown up generally to manhood under other influences, are affected by coming under the influence of American climate and American habits of life. By merging these two classes, as has heretofore been done, we obtain neither. The foreign-born population will be lost in the greater numbers of the native, while at the same time it will be sufficiently numerous seriously to affect the proportions of the latter, and, perhaps, in certain classes, entirely to reverse results.

The following table exhibits the classification according to age, sex, and nativity adopted at the present census, as compared with the classification at the Eighth Census:

Treatment of the classification of population by age and sex at the censuses of 1860 *and* 1870.

Occupations.—Even more considerable has been the addition made to the tabulation of occupations. Instead of a simple count, as in 1860, the number of persons in each specified occupation will, in the publications of the present census, be distributed duly between the two sexes, among three designated periods of life, and among the principal foreign nationalities represented in our population. In the belief previously expressed in the course of this report, that the tables of occupation are not only of the first importance in the interest of moral and social science, but that they afford the only true basis for calculating the industrial capacity and production of the country, the following form has been prescribed for tabulating the employments of the people:

TABLE OF OCCUPATIONS.

1860.	OCCUPATIONS.	1870.																	
			AGE AND SEX.						NATIVITY.										
			10 to 15.		16 to 59.		60 and over.

*Could not be distinguished on table of occupations.

The figures in the above table are for the State of New Hampshire. The few employments particularized have been taken at random, for the purpose merely of illustrating the form of tabulation adopted. To embody the whole list of occupations specified would have made the table too cumbersome for this place.

Nativities.—The innovation made in the tabulation of nativities consists solely in the distinction, now introduced for the first time, between white and colored in the tables (V to VIII of this present volume) which exhibit the countries of foreign and the States of native birth. The change is so simple as not to require the introduction of a specimen table. The distinction is principally of value as showing the movements of the native colored population.

Illiteracy.—The scope of the statistics of illiteracy, as before explained in remarks upon the changes made in the schedules, has been considerably enlarged by the extension of the inquiry to persons between ten and twenty years of age. The labor of compilation has been still further increased by subdividing each of the headings of the tables of 1860 according to three periods of life. The additional information thus secured was urgently solicited by the Commissioner of Education, and by gentlemen in all sections of the country prominently connected with the cause of public education. The following table exhibits the treatment of illiteracy in the compilations of 1870 as compared with those of 1860.

* Eleven Indians are here, for convenience, reported among the colored; 10 in Coos County, and 1 in Grafton County.

Mortality Statistics.—The grouping of States into districts for the purpose of the Mortality Statistics, adopted in the publication of the Eighth Census, has been abandoned in preparing for the publication of the present census. The statistics will, as at the Seventh Census, be presented by States. This return to a former method does not defeat the possibility of comparison. Any one who desires to obtain the statistics of mortality for the year 1870, according to districts, will find all the material at his hand for the purpose, and may group the same according to his own theories or wishes. But there appears to be grave reason to doubt whether the meteorology of the United States is sufficiently far advanced to enable States to be thus grouped, according to their climatic conditions, with any degree of safety. It is evident that if the States and Territories of the United States are to be classified by districts, according to an assumed unity of vital conditions within each district, it is a matter of absolute necessity that the propriety of the classification shall in every case be beyond question. Otherwise such an arrangement, instead of bringing out the truth, will only serve to conceal it.

It is perfectly conceivable that, by introducing into each group one State only which actually belongs in some other group, the most important characteristics of every State and Territory in the Union, by turns, might be completely hid from view. The value, therefore, of statistics of mortality, where the principle of grouping is adopted, depends upon the absolute correctness of the system. But since there is grave reason to doubt whether the measurement of cold, heat, and moisture by extremes and by averages in the United States has been advanced to such a degree as to allow a true classification of States according to these conditions, it has been thought best to present the material in a form which admits of combinations at pleasure.

I should have held these views with much diffidence had they not been confirmed by correspondence with some of the most eminent writers upon these subjects.*

In determining the classification of diseases that should be adopted in the compilations of the census, and in deciding the numerous questions, both of principle and of detail, which must arise in the progress of such a work, it would be necessary for the Superintendent either hastily to prepare himself as best he could for the service, at the serious risk of committing many errors of judgment, or else to obtain professional assistance. Between the two courses I had no difficulty in deciding in favor of the latter, nor did it seem any more a matter of doubt that it was preferable to have the scientific control of the work assumed by some recognized official authority, if practicable, rather than to have it given into private hands. I therefore took the liberty of addressing Major General Joseph K. Barnes, Surgeon General United States Army, with the request that, while the entire clerical labor should be performed in the Census Office, the determination of scientific questions arising in the course of compilation and publication might be assumed by his department. I have to acknowledge the cordial co-operation of General Barnes, and of the accomplished officers of the medical staff, Brevet Lieutenant Colonels J. J. Woodward and J. S. Billings, with whom, as representing General Barnes in this matter, I have had constant communication upon subjects of the character indicated occurring in the course of compilation. Colonel Woodward's letter, prefixed to the Tables of Mortality, states with clearness all the decisions successively reached during the progress of this work, and explains forcibly and succinctly the reasons which controlled in such decisions. The Mortality Statistics of the present census are submitted with full confidence that the medical profession, the life-insurance interest, and the country generally, will approve them, making such allowances as are just for necessary imperfections under the present system of enumeration.

In compiling the Statistics of Mortality, the same classification of ages, up to the limit of eighty years, was adopted as in the statistics of the living population. Reference to the specimen table of Age and Sex will show the extent of this change. The distinction of Native and Foreign, however, was not carried through the tabulation of Ages from the Mortality Schedules, but has been made in another connection hereafter to be mentioned.

The Mortality Statistics of the Eighth Census were obtained by tabulating the deaths reported upon a single sheet, to give the age, the sex, and the month of death. In addition to this, a second and a third tabulation have been carried on for the Ninth Census, with a view to exhibit the number of deaths from each specified cause, by

---

*I am at liberty to make the following extract from a letter of J. W. Draper, LL. D., author of "The Intellectual Development of Europe," "The Future Civil Policy of the United States," etc.

"I have frequently had occasion to reflect on the subject to which you refer—the sectional grouping of the States adopted in the census as respects mortuary statistics.

"As they stand now, eight of the districts are said to represent the climate characteristics of the country. Such an assertion, however, cannot be made of them with anything like scientific accuracy. This grouping accords neither with the annual isothermals, nor with those of summer or winter. The ninth district is avowedly an exceptional case.

"Considering how imperfectly the meteorology of the continent is at present understood, any system of grouping dependent on it must be liable to fallacy. In ten years more, perhaps, such an attempt may possibly be executed, but for the present I agree fully with you, that it is best to abstain from the employment of such a device, notwithstanding the desirability of retaining the forms and molds of previous censuses. Compactness, or space saved in the work, is not to be considered for a moment when at the risk of conveying false information.

"My advice is, therefore, to abandon the present fictitious grouping."

Occupations, by Nationality, and by Color. The reason for undertaking this additional work has been that the relations of occupation, of nationality, and of race (so far as the same is indicated by color) to life and health are believed to be quite as important as those of the seasons of the year. The publications of the Seventh Census (1850) presented the Statistics of Mortality tabulated with respect to occupations; but the work does not seem to have been undertaken at the Eighth Census.

The results of such tabulations are shown by the specimen tables following. These tables are only extended vertically and horizontally far enough to indicate the scope of the additional statistics secured.

DEATHS FROM EACH CAUSE, WITH DISTINCTION OF CERTAIN SPECIFIED OCCUPATIONS.

(This form and corresponding one for females constitute the table for each State and Territory.)

PUBLICATION OF RESULTS.

The results of the Ninth Census will, under authority of the joint resolution of April 13, 1871, be published in three quarto volumes. The number of volumes thus authorized corresponds to the most obvious division of the statistics of the census, viz: I. Population; II. Vital Statistics; III. Industry.

Into the first would naturally fall such of the so-called social statistics of the census as bear most directly upon the moral, social, and intellectual condition of the people; the statistics of churches, libraries, schools, newspapers, pauperism, and crime. The second would embrace the statistics (Schedules Nos. 3 and 4) of agriculture and manufactures, (the third grand division of industry, viz, commerce, not being recognized in the census;) the tables of occupations, derived from Schedule No. 1, and certain of the social statistics, (Schedule No. 5,) viz, valuation, taxation, and indebtedness, with whatever may be published on the subject of wages. The third would embrace the tables of mortality; the statistics of the blind, deaf and dumb, insane, and idiotic; the birth-tables, and whatever of value, if anything, can be obtained from the schedules in respect to the month of marriage.

There remains but one class of tables to be assigned, viz, the tables of age and sex. In the publications of the Eighth Census, these tables appeared in the population volume. They have, however, an even more obvious connection with the vital statistics of the country. In fact, the tables of age and sex have a double relation. It is proposed, therefore, to include the extended tables of age and sex in the volume which contains the statistics of births and deaths; while the population volume will contain selected tables of age and sex, showing (1) the total number of persons of each sex, (2) the number of each sex of school age, (3) the number of males of military age, (4) the number of males of voting age.

Economy of space.—Although the tabulation of results carried on at the present census has been so much more extensive than heretofore, the aggregate bulk of the several volumes will be little more than two-thirds that of the four volumes of 1860. The publications of the Eighth Census aggregated 2,875 pages. The three quarto volumes of 1870 will fall short of 2,000 pages. This saving in space, notwithstanding the largely increased amount of statistical matter to be provided for, will be mainly effected, first, by dispensing with everything in the nature of literary, historical, or economical disquisition; secondly, by printing in double or treble measure tables which heretofore have been printed in single measure; third, by publishing the living population according to the extended classification of age, by totals of States instead of by totals of counties. The reason for the latter change is that, while it is believed that the minuter distinctions of age are of the greatest value for the country as a whole, and even by entire States, it is not believed to be of importance that these distinctions should be carried out in respect to the population of each of the twenty-two hundred counties of the Union. The results of the compilation by counties will, however, be preserved at the Census Office for reference, should there ever be occasion to consult them. Those distinctions of age which are of importance as applied to smaller civil divisions, (the school, military, and voting ages,) will, as before stated, be given by counties and also by cities and towns, but at scarcely one-tenth the cost of space required by the extended classification of age and sex.

The saving on account of each of the two former changes amounts to several hundred pages. A portion of the space thus economized has been used for the new tables, now first appearing, and the volumes have at the same time been greatly reduced, as indicated.

Condensed and selected tables.—Another noticeable feature of the present work consists in the use of tables containing condensed or selected results, where reasonable limits of space will not allow of the publication of the full details.

Preservation of intermediate results.—In the course of compilation at the Census Office, however, a vast amount of information will still be obtained, as a means to more general results, which no reasonable limits of space would allow to be published, and which may yet be of local interest and well worthy of preservation. For example, referring still again to the statistics of nativities, it would be altogether impracticable to publish the results, even in the most condensed form, by towns and villages; and yet it is often a matter of considerable present interest and importance to be able to determine the constituent elements of their population, while for the purposes of town or county histories, twenty or fifty years later, no class of information would be more highly prized. So far as practicable, therefore, a complete record has been kept of all intermediate results reached in the compilations of the present census.

One typographical feature of the present publication may be alluded to in passing.

As a rule, in all tables extended vertically and horizontally, the totals are placed at the top and at the left, instead of at the bottom and at the right, as usual, while of successive periods named, the nearer and not the more remote in time is placed at the left. The advantage of this deviation from the customs of American statistical publications it is believed will become apparent on the first glance at the tables which follow. No one who has had frequent occasion to follow a line of figures across a page, or two parallel pages, to find the total at the opposite end, at the imminent peril every instant of losing the line, and with a feeling of doubt at the last whether he has actually kept it after all, but will appreciate the advantage of having the totals brought up, as in the present publication, to the left hand, where they stand immediately against their respective titles. For somewhat the same reason, the totals of vertical columns are carried up to the top; and of several successive periods, placed longitudinally, the nearest in time is brought to the left.

REPUBLICATION OF PREVIOUS RESULTS.

Comparisons with the results of previous censuses have been very extensively introduced into certain portions of the publications of the present census. Tables I and II of the population volume will be found to contain the totals of population, with distinction of color, for each of the nine censuses now complete.

A sufficient reason, it is believed, in addition to the acknowledged convenience and instructiveness of such comparative statistics, for so extensive a republication of previously ascertained results, has been found in the increasing scarcity of the published volumes of the earlier censuses. The first four—those of 1790, 1800, 1810, and 1820—are indeed almost wholly inaccessible, even to the majority of scholars and statesmen. But few, even of the larger libraries of the country, contain these publications. The library of Harvard College and the library of the Boston Athenæum contain copies of the official censuses of those years. The public library of Boston possesses only forty pages of the census volume of 1820, and nothing of those of 1790, 1800, and 1810. The public library of Philadelphia possesses the censuses of 1790 and 1820, and wants those of 1800 and 1810. The Astor and Mercantile libraries of New York contain none of the publications of the census from 1790 to 1820.

The Census Office itself wants the census of 1790; and in order to complete the statistics here presented, the Library of Congress, which contains a full collection, has been consulted, as well as the original manuscript returns deposited in this office.

So strongly was the scarcity of these early censuses felt, even at that date, that Congress, by the thirteenth section of the act approved March 23, 1830, directed the republication of the results of the first four censuses, in connection with the Fifth Census; but so hastily and heedlessly was this work performed, that it must be regarded as absolutely valueless. Many pages of that republication would, by merely noting the necessary corrections, be almost as much disfigured as the worst proof of statistical matter ever seen in a printing-house.

A specimen with corrections indicated, is given below:

FIRST TWENTY-FIVE COUNTIES OF VIRGINIA, CENSUS OF 1800, AS REPUBLISHED.

COUNTIES.	FREE WHITE MALES.					FREE WHITE FEMALES.					All other free persons, except Indians not taxed.	Slaves.	Total number.
	Under 10 years of age.	Of 10 years and under 16.	Of 16 and under 26, including heads of families.	Of 26 and under 45, including heads of families.	Of 45 and upwards, including heads of families.	Under 10 years of age.	Of 10 years and under 16.	Of 16 and under 26, including heads of families.	Of 26 and under 45, including heads of families.	Of 45 and upwards, including heads of families.

(v) This line of figures does not express Dinwiddie County. Add the corresponding line of Petersburg and each item will be changed and the total of the county will be as by foot-note (t.)

In consideration of the above facts it has been thought desirable that the reports of the present census should present such a view of the results of preceding enumerations as is to be found in the accompanying tables.

In connection with this republication, the totals of population, heretofore published, have been carefully compared with the separate items, and with the original manuscript returns on deposit in the Census Office.

This comparison has resulted in the correction of county aggregates, in a very considerable number of cases, and of county totals by classes, (white, free colored, slave, Indian, &c.,) to a still greater extent. These errors, however, frequently balance each other and are lost in the aggregates of the States, so that the only cases in which the State aggregates have been corrected by the comparison, are as follows: Georgia, Kentucky, and New York 1800; Virginia, 1810; Arkansas, Maryland, North Carolina, Tennessee, and Virginia, 1820; Virginia, 1830.*

In addition to the above, there is another large class of errors of a clerical or typographical character which

* The table of *Arkansas* corrects the official census of 1820 by increasing whites 27.

The table of *Georgia* corrects the official census of 1800 by diminishing free colored 900, and slaves 293; also corrects the schedule of the census of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by increasing whites 583, slaves 2, and the aggregate 585.

The table of *Kentucky* corrects the census of 1800, the schedule of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by increasing whites 2, and diminishing free colored 2.

The table of *Maryland* corrects the official census of 1820, the schedule of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by diminishing whites 1, and increasing slaves 1.

The table of *New York* corrects the census of 1800 by increasing whites 2,515, free colored 43, slaves 290, and the aggregate 3,001; also the schedule of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by increasing whites 1,692 free colored 43, slaves 560, and the aggregate 2,295.

The table of *North Carolina* corrects the census of 1820, and the retrospect tables in the compendium of 1840 and in the censuses of 1850

have occurred frequently in the most important portions of the several official censuses, examples of which appear in the notes to Table II.

A single result of these examinations into the earlier censuses has enough of curious and perhaps of substantial interest to be noted here. The State of Vermont was, in the publication of the first census, that of 1790, put down as numbering among its inhabitants sixteen slaves. In subsequent publications this number was, by a clerical or typographical error, changed to seventeen; but, with this accidental variation, the statement of the first census has passed unchallenged, and antiquarians have even taken pains to explain in what manner it was that this small number of slaves should have been found in a State otherwise through all its history a free State.

The re-examination of the original census-roll of Vermont at the census of 1790, for the purposes of this republication, brought to light what had never before been suspected—that these sixteen persons appeared upon the return of the assistant marshal as "free colored." By a simple error of compilation, they were introduced into the column for slaves; and this error has been perpetuated through nearly the whole history of the Government until corrected in the accompanying tables.

Table of cities, towns, &c.—In Table III of the population volume, which contains the population of all recognized civil divisions less than counties, (cities, towns, townships, villages, boroughs, beats, wards of parishes, election districts, militia districts, &c.,) comparison with the results of 1850 and 1860 has been introduced as far as practicable. For this purpose the manuscript returns of the Seventh and Eighth Censuses have been carefully compared with the tables of cities, towns, villages, &c., in the published volumes. The latter have been found to be exceedingly defective and inaccurate. Several thousand civil divisions have been added to the list, which were entirely omitted from the publication of these censuses, although recognized on the returns of assistant marshals. Reference to the original manuscripts, for this purpose, elicited the additional fact that not only were the lists defective, but the figures, as published, were very inaccurate for the cities, towns, &c., actually appearing.

To take one class of errors in this exhibit, and to illustrate them from a single State: an extensive table appears in the population volume of 1860, which purports to give the population of the "cities, towns, &c.," of Ohio. Examination of this table and reference to original returns show that sometimes it is the population of the town which is given; sometimes the population of the township including the town; and sometimes the population of the township outside the town.* These variations occur continually through the list, and corrections to the number of many hundreds in that State alone have been rendered necessary in the present republication. The additions and corrections introduced in several other States have been almost as numerous.

These remarks are not made with a view to the disparagement of any person, but to show the necessity of such a republication, and to let it be understood that in all points in which the tables appended disagree with preceding publications, the present is the authoritative statement.

---

and 1860, by increasing free colored 100, and diminishing slaves 100; also corrects the schedule of 1830, by diminishing whites 100, increasing free colored 100, and diminishing slaves 100.

The table of *Tennessee* corrects the census of 1820, the schedule of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by increasing free colored 10 and the aggregate 10.

The table of *Virginia* corrects the census of 1810, the schedule of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by decreasing whites 20, slaves 2, and the aggregate 22; also corrects the census of 1820, the schedule of 1830, and the retrospect tables in the compendium of 1840 and in the censuses of 1850 and 1860, by increasing whites 11, and diminishing free colored 6 and slaves 5; also corrects the retrospect tables of the censuses of 1850 and 1860 by diminishing whites 2, free colored 6, slaves 5, and total 13.

* *E. g.*: Each of the townships of Ashtabula, Athens, and Conneaut contains a borough or village of the same name. In the list of cities, towns, &c., referred to, Ashtabula appears with a population of 1,418; Athens, with a population of 2,852; Conneaut with a population of 1,952. In the first case, however, it is the borough only of Ashtabula that is given; in the second case, the population of the township of Athens is put down, including the village of the same name; in the third case, what is reported as Conneaut is only so much of the township as lies outside the town of that name. The real facts in regard to these towns and townships were as follows:

Borough of Ashtabula	1,418
Outside the borough	1,322
Township of Ashtabula	2,740
Village of Athens	1,341
Outside the village	1,511
Township of Athens	2,852
Borough of Conneaut	964
Outside the borough	1,952
Township of Conneaut	2,916

The list of civil divisions for the Ninth Census, now for the first time published, is as complete as it could be made by the most stringent instructions to marshals and assistants in regard to preserving all recognized denominations, and by an extensive correspondence with the executives of the several States. Wherever it fails to present any civil division of sufficient consequence to justify its preservation, or any mistake has been made in the classification of such civil division as town, township, borough, village, &c., it is for the want of necessary data at the Census Office, after all possible exertion had been put forth to secure complete lists. It has been a matter of surprise to find how deficient the records of many States of the Union are in respect to their own existing civil divisions, and particularly in regard to changes of boundary, of name, or of municipal character, within a comparatively recent period. In the case of some, notwithstanding the expressed willingness of the executive to afford such information, it has been impossible to secure a simple list of the existing townships of the State at the present time. Of course, in such a condition of things, it has been altogether out of the question to obtain an account of the *changes* occurring in past years.

It has been sought to accompany this comparative statement of population with such explanations as should account in every case for the disappearance of old and the appearance of new civil divisions within the same State or county, explaining all changes of name and accounting for the population thus lost or found. In some instances it has proved impossible to secure the information desired. In such cases the figures are given just as they are found in the different censuses, and it is left to local research to apply the key to changes which it has been impossible at this distance to explain.

The value of a correct publication of all the civil divisions of the country, large and small, cannot be overestimated. It is the feature of the census in which a greater number of citizens are interested than perhaps in any other, except the single page which exhibits the grand totals of population. Special pains, therefore, have been taken with this table. The more usual distinction, namely, that of sex, has been omitted, and the population has been distinguished instead as native or foreign, white or colored. The reason for this has been that, as reasonable limits of space would not suffice for the publication of all the facts, a selection was made of those which are most important to be stated.

It will at once be seen that, with a given population in any town or city, the respective numbers of males and females may be predicated with a very close approach to accuracy. The sexes will throughout be evenly balanced, or one or the other will have a very slight preponderance. Natural laws maintain a substantial equality. But with such a population it is impossible to predicate anything whatever in regard to the proportions of native and foreign, of white and colored. The foreign element may be one-half or three-fourths, or it may be but the tenth of one per cent. The black population may be largely in preponderance, or there may not be a single representative of that color found. Hence, these two classes of facts have been taken as the most important to be preserved. The proportion of the sexes will be shown in connection with the tables of age.

ADMISSION OF ERRORS AND DEFICIENCIES.

The statistics of the census are not of uniform value. The census law of 1850 was a purely tentative measure. Some of the inquiries which it proposed are such as the country is not even yet ripe for. In respect to others, no adequate machinery is provided; and the investigations from that cause fail to accomplish worthy results. In respect to others, still, the compensation provided is so inadequate that, although the statistics are easily accessible, and the machinery for their collection is well adapted to the purpose, the motive force is wanting to secure the thorough performance of the duty. From these three causes it follows that the agents of the census are charged by law with the collection of statistics upon certain subjects where a partial failure, more or less considerable, is inevitable. Yet these statistics the authorities of the census are presumably bound to publish, except where the results are so flagrantly wrong as to be calculated to deceive rather than to instruct.

In such a state of things it would seem to be the duty of those charged with the publication of these statistics to indicate in respect to each class the degree to which the figures may be relied upon, and, as nearly as may be practicable, the proportion of omission or error. It is undoubtedly true that many will by such a course become advised of these deficiencies who never would have discovered them. It is probably true also that many persons will, when candidly advised of the necessary limitations of such statistics, proceed to the conclusion that they are all worthless, and thus reject the whole. It is unquestionable, therefore, that the results of the census would obtain more credit if put forth without any admissions or exceptions; but I have not deemed such a course fair to the public. If, in the progress of compilation or correspondence, defects more or less numerous and important have been detected, which it is yet impracticable to remedy, the country has as much right to that information as to the actual figures of the census.

COMPENDIUM OF THE NINTH CENSUS.

It is recommended that a compendium of the Census in octavo form be authorized for wide popular distribution. With a view to the publication of such a volume, which, though it should contain little original matter, or none, will yet require much care and labor in its preparation, I have already forwarded an estimate to be embodied in the estimates of the Department for the fiscal year 1872–'73, for the salaries of a chief clerk and six clerks of class four, for three months from the 1st of July next, with a small allowance for the miscellaneous expenses of the office during the time.

The whole of this appropriation may not be required, but it seems best that the service should be fully provided for, if a compendium is to be authorized. Work upon it can be commenced at once, more than three-fourths of the tables which are to furnish the material for the compendium being already prepared. The remainder may be delayed a few months, but enough will be on hand constantly to allow of uninterrupted progress being made with the selections, the condensations, the groupings, the calculations of percentage, &c., necessary to present the results of the census most accessibly and most instructively for popular use.

THE CENSUS OFFICE.

The Census Office was organized on the 7th of February, 1870, by the appointment of a Superintendent. By making special arrangements with the marshals of the larger States, it was found practicable by the 1st of July to have a considerable force of clerks engaged upon the work of compiling the returns according to the forms adopted for tabulation, both those hitherto used and those which were introduced for the first time at the present census. The advantage of this early organization was twofold. It enabled the Superintendent to call the attention of marshals and assistant marshals to mistakes which were being committed in the course of the enumeration, in season for such errors to be corrected upon the greater portion of the returns; and it also gave the office a large number of trained clerks against the time when the main body of the returns should be received.

The clerical force of the Census Office has been raised, in accordance with the provisions of law, by a system of examinations. Examinations began upon the 18th of February, 1870, and have been continued, with longer or shorter intervals, according to the necessities of the office, to the present time. Seven hundred and nineteen persons have presented themselves before the board for examination. Of this number, 401 passed upon their first examination. The marking being upon a scale of 1,000, 1 passed above 950, 5 between 900 and 950, 17 between 800 and 900, 42 between 700 and 800, 52 between 600 and 700, 102 between 500 and 600, 98 between 450 and 500, 84 between 400 and 450, 103 between 300 and 400, 89 between 200 and 300, 74 between 100 and 200, and 52 under 100.

By the rule adopted at the commencement of the examinations, any applicant attaining a total of 450 marks was promised an appointment. No one could be appointed to a first-class clerkship who failed to reach 400; between 400 and 450, appointment might be given or withheld, at discretion.

Of those who failed upon first examination, 64 were allowed another examination upon the presentation of evidence which established a presumption that the first examination had not, generally from reasons of physical disability at the time, afforded a fair opportunity. Of this number, 37 succeeded upon another trial. Of these, one only passed above 700; three between 600 and 700; twelve between 500 and 600; twelve between 450 and 500; nine between 400 and 450; nine between 300 and 400; seven between 200 and 300; three between 100 and 200, and eight under 100. The fact that the proportion of those who passed upon the second trial is almost exactly the same as of those who passed upon the first, and that at a second examination nearly all who succeeded did so with a narrow margin, is the strongest confirmation that could be afforded to the justice and accuracy of the test applied.

These examinations were conducted by the use of sealed papers. Each person examined was furnished with a written list of the questions and problems proposed, and was allowed six hours in which to perform the work. The papers were examined by the board without a knowledge of the applicant's name, and it was only after his standing had been determined that the envelope containing his name was broken.

The examinations were mainly in the practical use of figures, being designed specially to test the fitness of the candidate for the work of the Census Office. New series of questions were frequently introduced, in order to secure the integrity of the examination; but it was sought at each change to make the new series an exact equivalent of the former one. Each part was examined and marked by itself, so that however gross the error which the candidate might commit at one point, it should not prejudice whatever merit might be found in others. It will be a matter of surprise to many to see such a wide range, as the result of these examinations, in the marks of the individual applicants. The differences indicated in the arithmetical aptitude and ability of applicants are not, however, greater than those which exist between men actually in office under the Government.

Unquestionably one reason why so much prejudice is excited by a rigid system of examinations, and why so many inefficient persons are, in the absence of such a system, pressed upon the public service, is that these differ-

ences are not appreciated. No one probably would question, for a moment, that differences exist among men of ordinary intelligence in respect to clerical aptitude; but it is too commonly assumed that they are no greater than the differences which exist in respect to strength, or weight, or stature. No one probably would doubt that one clerk might be better than another, just as one clerk will be heavier than another, by ten, twenty, or even, in a few extreme cases, thirty per cent.; but that such differences go really to the extent of making one good clerk more valuable than two, or three, or four merely moderate clerks, while no consideration whatever can make it worth while for the Government to give desk-room to a really poor clerk: this is not generally understood.

These comments upon the examinations of the Census Office have been made strictly with reference to the qualifications of the applicants for the work of that office. It has been fully recognized that many have been rejected who might have made excellent corresponding clerks, or have succeeded admirably in the conduct of general business. The qualifications which the Census Office demands are the average qualifications of a good bank clerk or paymaster's clerk; and with a view to such duties, the differences in ability which have been developed by this series of examinations, represent actually the differences between men as they are found in the community, and as they apply for public office.

ACKNOWLEDGMENTS.

The clerical force of this office deserve the warmest commendation for the high standard of industry and efficiency which their own zeal and fidelity, rather than administrative measures on the part of the Superintendent, have maintained. Especially to Colonel G. D. Harrington, chief clerk, and to the following gentlemen, chiefs and assistant chiefs of division, are my thanks due: S. W. Stocking, C. S. Mixter, C. W. Seaton, D. S. Keller, W. J. Warren, Henry Stone, S. A. Galpin, J. M. Grassie, A. W. Paine, J. Q. Adams, J. W. Bradshaw, Lockwood R. May, and J. P. Scott. These gentlemen were chosen for the positions to which they were assigned without the slightest reference to any other consideration than their personal fitness for the work; and the results have fully justified their selection. They have not allowed themselves to measure their service by the usual requirements of public office, or by the demands made upon them, but have served the Government unsparingly to the utmost of their strength. They deserve, therefore, to have their names connected with this record of the Ninth Census.

Acknowledgment is due to the Honorable the Postmaster General, and to the Hon. J. M. Edmunds, postmaster of the city of Washington, for exceptional facilities in the prompt and safe transmission of the vast bodies of mail-matter which this office has had occasion to send and receive.

No expressions which I could use would exaggerate the assistance which the Census has derived from the manner in which its numerous and most difficult demands upon the Government Printing Office have been met. To Hon. A. M. Clapp, Congressional Printer, and to his zealous and capable assistants in every department of the great public work under his charge, this office is indebted for services far beyond the requirements of law or usage.

To you, sir, and to your predecessor in the administration of the Department, the Census Office is under the deepest obligations for the enlightened interest invariably manifested in its success, and for the kind, liberal, and courageous support given to every proposed improvement or reform.

I have the honor to be, sir, very respectfully, your obedient servant,

FRANCIS A. WALKER,
Superintendent.

DEPARTMENT OF THE INTERIOR,
Census Office, November 21, 1871.

NOTE.—Subsequently to the date of this report, it was discovered at the Census Office, that a portion of the population of Linn County, Iowa, to the number of 2,228, although duly enumerated, had, through oversight, failed to be returned by the United States marshal. It was also ascertained that one sheet of schedules from Luzerne County, Pennsylvania, had been mislaid, and the inhabitants returned thereon to the number of 160 had been omitted from the count. In reprinting the report, for the purposes of the present publication, the changes involved in the correction of these two errors have been carried through the tables and the computations in the text.

NOTE.—The narrow column under each census year shows the order of the States and Territories when arranged according to magnitude of population in the aggregate or in each class.

(*) "All other persons, except Indians not taxed." In the form of Schedule I, transmitted by the Secretary of State to the marshals, and in the tables of the official census of 1820, this heading was printed without a comma. Yet it was printed with a comma after the word "persons" in the schedule which was made a part of the census act of 1820, and the thirty-third interrogatory prescribed by the Secretary of State to be put by an assistant marshal to a head of a family was: "How many other persons, EXCEPT INDIANS NOT TAXED?" This interrogatory follows the punctuation of the schedule in the census act, and the care taken to emphasize the last clause by capital letters relieves the meaning of the interrogatory from doubt. A few Indians taxed were included in this column, as were also persons in the military and naval service of the United States, inmates of prisons, alms and poor houses, and generally such persons as assistant marshals could not locate in a family. The quantities marked with an asterisk (*), as well as all others in Tables I and II, which are interlined above another, are not included in the lower quantity, but the two are additive.

(a) To obtain the total population of the United States at the census of 1840, it is necessary to add to the printed total of the aggregate table 787, being the increase of the second enumeration of the county of Montgomery, Maryland, over the first enumeration.

(b) In the aggregate table of the census of 1820, the total of the State of Tennessee is printed 422,613 instead of 422,813, as given by the tables of Tennessee in the same census. This error of the total column of the aggregate table having been corrected, the above variance applies.

(c) In the aggregate table of the census of 1800 the total of Kentucky is printed 220,959. The table for Kentucky in the same census has it 220,955; also the total of the eastern district of Pennsylvania is printed 327,979 instead of 327,799. These errors of the total column of the aggregate table having been corrected, the above variance applies. See note (d,) page 4.

On public ships in service of the United States.....	....	.....	....	.....	....	.....	6,100		5,318		....	.....	....	.....	....	.....	....	.....

(*a*) To obtain the total white at the census of 1840, care must be taken to include 6,100 persons on board public ships, and 487, being the increase in the white of the second enumeration of the county of Montgomery, Maryland, over the white at the first enumeration.

(*b*) In the aggregate table of the census of 1820, at Tennessee, "White males to 45" are printed 27,349 instead of 27,549, as rightly given in the tables of the State of Tennessee. This error in the white column of the aggregate table having been corrected, and consequently the total white having been made 200 more than there printed, the above variance applies.

(*c*) In the aggregate table of the census of 1800, at New Jersey, "White males under 10" are printed 33,900 instead of 33,980; at District of Columbia, in the same column, 889 should be 689; at Kentucky, "White males 65 and upwards," printed 9,238, should be 9,233; at Western District of Virginia, "White females 26 and under 45," printed 8,632, should be 15,169; and column "White females, 45 and upwards," printed 15,169, should be 8,632; and at "Indian Territory" add 766 to the total of the items for the columns of the White, in order to balance "766 persons" added to the total of the Territory in the table under correction, but not then placed in any of the classes of the population of the Territory. These "*persons*" are thus assumed to be whites, but cannot be distributed among the Age and Sex columns of the whites in that table. These errors of the White columns of the aggregate table having been corrected, the above variance applies.

(*d*) In the columns of Table I, devoted to the Second Census, the sum of the variances in the classes of population does not equal the variance at the aggregate. In explanation of this apparent inconsistency, it is necessary to state that the table showing the aggregate population at the Second Census, as originally published, had no complete summary line, and that the official totals of that census have been established in the following manner. After correcting the indigenous errors of that table, in accordance with notes (*c*), pages 3 and 4 of this volume, and striking out the lines of the table for Maryland and "Baltimore County," and inserting in their stead the line of "Maryland, corrected," the columns have been added, and the total white afterwards obtained by adding the totals of the ten Age and Sex columns. The result held to be the official totals of the Second Census appears in the second line of the following tabular statement, which, with the subsequent annotation, is in explanation of the failure of the variances of the above table for the Second Census to form an equation:

	White.		Free colored.		Slave.		Aggregate.
The Second Census as published at the Ninth Census	4,306,466	+	108,435	+	893,602	=	5,308,483
The Second Census as originally published	4,303,929	+	109,294	+	893,605	>	5,305,482
Variances of the former from the latter publication	+ 2,517	—	859	—	3	<	+ 3,001
Variances of the latter publication from a balanced total line (assuming its "Aggregate" to be correct as it was, disregarding the 3,001, found after the publication)	+ 151	+	902	+	293	>	0
Variances of the former publication from the balanced totals of the latter	+ 2,668	+	43	+	290	+	3,001

The first line of this statement is an equation; the second an inequation, whose second member is correct, and whose first member is in each term too large to permit that member to equal the second member; consequently the third line of the statement, obtained by subtracting the second line from the first, must be an inequation, whose second member is correct, and whose first member is in every term too small as a member of an equation. The third line is the series of variances inserted in Table I of this volume, and expresses the differences between official totals, as originally and now published. The fourth line of the statement furnishes the numbers which, by enlarging each term of its first member, change this inequation to an equation, and produce the fifth line of the statement, which expresses the additional population discovered by the recount at the Ninth Census of the original returns of the Second Census for the State of New York. (See note (*a*), page 52.)

On public ships in service of the United States																		

(a) Heretofore no combination of the slave and the free colored population has been published in the recapitulation table of any official census. Indeed, a careful research has failed, with one exception, to discover in any previous census any table showing the total colored population. There having been no previous publication of this kind, the several variances on this page, instead of being strictly "Variances from former official totals," are rather the combined effect of variances shown on the pages of the table devoted respectively to the free colored and the slave population.

(b) CALIFORNIA, GENERAL NOTE.—At the census of 1850 the returns for Contra Costa and Santa Clara Counties were lost on the way to the Census Office, and those for San Francisco County were destroyed by fire. The State census of California for the year 1852 which, pursuant to a joint resolution of Congress, was appended to the official census of the United States for 1850, gives the population of these counties as follows: Contra Costa, white, 2,487; free colored, 21; Indian, 278; aggregate, 2,786. Santa Clara, white, 6,158; free colored, 56; Indians, 550; aggregate, 6,764. San Francisco, white, 35,531; colored, 464; Indians, 159; aggregate, 36,154. Aggregate of the three counties, 45,704: constituted of white, 44,176; free colored, 541; Indian, 987. The population of the State at 1852, as given by the above authority, was: white, 171,841; free black, 1,678; free mulatto, 528; Chinese, 9,809; and Indian, (domesticated and nomadic,) 31,266; aggregate, 215,122. To this was added an estimate for El Dorado County, from which there were no returns in that census, of 40,000 not distributed among the races, which increased the aggregate of the State to 255,122.

(a) Then in the Territory of Mississippi.
(b) In 1868 Baker from Autauga, Bibb, Perry, and Shelby.
(c) In 1858 name changed from Benton to Calhoun.
(d) In 1866 Bullock from Barbour, Macon, Montgomery, and Pike.
(e) In 1866 west half township 11, range 16, from Lowndes.
(f) In 1821 name changed from Cataco to Morgan.
(g) In 1866 Clay from Randolph and Talladega.
(h) In 1866 Cleburne from Calhoun, Randolph, and Talladega.
(i) In 1867 Colbert from Franklin.
(j) In 1866 Crenshaw from Butler, Coffee, Covington, Lowndes, and Pike.
(k) In 1866 Elmore from Autauga, Coosa, Montgomery, and Tallapoosa.
(l) In 1868 Escambia from Baldwin and Conecuh.
(m) In 1866 Etowah from Blount, Calhoun, Cherokee, De Kalb, Marshall, and St. Clair.
(n) In 1868 Geneva from Coffee and Dale. In 1869–'70 extended to Florida line.
(o) In 1867 Hale from Greene, Marengo, Perry, and Tuscaloosa.
(p) In 1850 Hancock, name changed to Winston.
(q) In 1866 Lee from Chambers, Macon, Russell, and Tallapoosa.
(r) In 1867 Sanford from Fayette and Marion.

(*) All other persons, except Indians not taxed.
(*a*) Then in the Territory of Louisiana, and returned as follows: "Settlements of Hopefield and St. Francis, white 159, free colored 0, slave 29, total 188; settlements on the *Arkensas*, white 765, free colored 2, slave 107, total 874."
(*b*) In official census of 1820 the column "White females, 10 and under 16," has a total of 900. The marshal's manuscript return shows this total to be 927, and the total of the State to be 27 more than then published.
(*c*) In 1869 Boone from Carroll and Marion.
(*d*) In 1869 part of Madison attached to Carroll.
(*e*) In 1869 Grant from Hot Springs, Jefferson, and Saline.
(*f*) In 1867 Little River from Hempstead and Sevier.
(*g*) Was southwestern county of the State. The part of it north of Red River now in Indian Territory. The part south of Red River now in Texas.
(*h*) In 1862 Cross from Crittenden, Poinsett, and St. Francis.
(*i*) In 1868 Sharpe from Lawrence.
(*j*) In 1862 Woodruff from Jackson and St. Francis.

											72							

(a) Including 33 Japanese.
(b) The State census of 1852 gives Chinese as follows: Nevada, 3,886, over 21 years of age; Placer, 3,019; Sacramento County, 804; and Yuba, 2,100. (*Vide* Doc. No. 14, Appendix to Senate Journal, 4th session legislature of California.)
(c) The State census of 1852 gives the following "Indians domesticated:" In Butte, 30; Calaveras, 1,982; Colusa, 66; Contra Costa, 278; Los Angeles, 4,193; Marin, 218; Mariposa, 4,533; Mendocino, 187; Monterey, 636; Napa, 1,328; Nevada, 3,226; Placer, 730; Sacramento, 80; San Diego, 2,273; San Francisco, 159; San Joaquin, 379; Santa Clara, 550; Santa Cruz, 110; Shasta, 73; Siskiyou, 26; Solano, 46; Sonoma, 376; Sutter, 514; Trinity, 4; Tuolumne, 590; Tulare, 8,407; Yolo, 152; and Yuba, 120. In Tulare, as well as in other returns, it is not stated whether they are domesticated. Total Indians, 31,266. (*Vide* Doc. No. 14, Appendix to Senate Journal, 4th session of legislature of California.)
(d) In 1863 Alpine from Amador, Calaveras, El Dorado, and Mono.
(e) The returns of 1850 for Contra Costa and Santa Clara were lost on the way to the Census Office, and those for San Francisco were destroyed by fire. The corrected State census of 1852 gives the population of these three counties as follows: Contra Costa, 2,786; San Francisco, 36,154; and Santa Clara, 6,764; and gives the total population of the State, (save El Dorado, not returned,) at 215,122. El Dorado was estimated at 40,000, which would make the total probable population at that date 255,122. (*Vide* Doc. No. 14, Appendix to Senate Journal, 4th session legislature of California.)
(f) Including 22 Japanese.
(g) In 1865 organized.
(h) In 1863 Lake from Napa.
(i) In 1863 Lassen from Plumas and Shasta.
(j) Including 2 Japanese.
(k) In 1860 organized.
(l) In 1863 organized.
(m) Including 1 Japanese.
(n) Including 8 Japanese.
(o) In 1857 San Mateo from San Francisco.
(p) In 1854 Stanislaus from San Joaquin and Tuolumne.

(*) All other persons, except Indians not taxed.

(*a*) In the official census of 1860, 468 whites, belonging to the town of Mansfield, Tolland County, were published as of Windham, Windham County. The totals of Tolland County have here been increased 468, and those of Windham County decreased 468.

(*b*) Thirty-seven other slaves were returned by the marshal, but have been omitted, being those captured in the slaver Amistad, and not of the population of Connecticut.

(*a*) It will be observed that the several classes of New Castle County (white, free colored, and slave) exceed the total of the county here given by 2. The error comes from the original return of the marshal in respect to this county. It is impossible to ascertain by reference to any printed or written document whether the error is in the items or the totals. The totals of the county and of the State have, therefore, been allowed to stand as they were printed in the official census of 1790. In Table I the items have been assumed to be correct, and the totals, 19,698 and 59,096, have been taken to be the correct totals of the county and of the State.

(*) All other persons, except Indians not taxed.
(*a*) Name changed to Bartow.
(*b*) In the official census of 1800 the totals of white, free colored, and slave did not make the aggregate as published. By correctly adding the columns of free colored and slave and changing the total of the county of Montgomery to 9,504, the total of free colored and slave becomes as here published, and the aggregate of the census of 1800 remains the same, and the table at that census balances. See note (*d.*) page 4.

(*a*) In 1866 Beltrami from Itasca.
(*b*) In 1862 Big Stone from Pierce.
(*c*) In 1862 part of Breckenridge to Clay, and in 1868 remainder to Wilkin.
(*d*) Absorbed by Pine.
(*e*) In 1862 Chippewa from Pierce and Renville.
(*f*) In 1862 Clay from Breckenridge and Polk.
(*g*) In 1868 Grant from Toombs, and original territory not included in any county.
(*h*) The status of this county is doubtful, the legality of its formation out of Renville County being questioned.
(*i*) Absorbed by Big Stone, Chippewa, Pope, Stevens, and Swift.
(*j*) In 1862 from Brown.
(*k*) In 1857 Rock. In 1860 erroneously reported as Pipestone.
(*l*) In 1862 Stevens from Pierce.
(*m*) In 1862 from Toombs, and original territory not included in any county.
(*n*) In 1858 Wadena from Cass and Todd.
(*o*) In 1860 Watonwan from Brown.
(*p*) In 1856 established as Toombs; in 1868 name changed to Andy Johnson, and in 1868 to Wilkin.
(*q*) Returned as having no population.

(*) All other persons, except Indians not taxed.
(*a*) Returned by the secretary of the Territory in two items, as follows: "Settlements of Hopefield and St. Francis, white, 159; free colored, 0; slave, 29; total, 188; settlements on the *Arkensas*, white, 765; free colored, 2; slave, 107; total, 874." All of these settlements were in the territory of the present State of Arkansas, and with the "District of New Madrid," which is now a part of the State of Missouri, were in the original county of New Madrid.
(*b*) Formerly western half of Putnam, afterward restored to Putnam.
(*c*) Name changed from Rives to Henry.
(*d*) Van Buren formerly comprised what is now Bates and Cass.
(*e*) In 1861 Worth from Gentry.

TERRITORY OF MONTANA.

(*) All other persons, except Indians not taxed.

(a) The tables for New York, as published in the official census of 1800, are grossly incorrect; they contain typographical and other errors in nearly every county; they duplicate some returns and omit others. The above columns of 1800 were directly obtained by a careful count from the original manuscript returns on file in the Census Office. As the table at 1800 did not balance, that is, as the sum of the items of the total line of the State exceeded by 153 the total of the State as printed, and as the table for 1800, above published, does balance, it follows that the sum of the variances at each class is 153 less than the variance at the aggregate. See note (d,) page 4.

(b) Clinton and Essex opposite Clinton.

(c) At first Tryon; in 1784 name changed to Montgomery.

(d) Parts of Herkimer, Montgomery, and Oneida, provisionally annexed.

(e) At first Charlotte; in 1784 name changed to Washington.

(*a*) Since 1860 Dare from Currituck, Hyde, and Tyrrell.
(*b*) In 1861 Transylvania from Henderson and Yancy.
(*c*) In the official census, column "Free colored, male, 26 to 45," adds 100 more than then printed.
(*d*) In the official census, column "Slaves, male, 14 to 26," adds 2,000 less than then printed; column "Slaves, female, to 14," adds 2,000 more than then printed; "Slaves, female, 45 and over," adds 100 less than then printed.
(*e*) In the Census Report of 1850, the white and free colored population of Alexander County was published as of Anson County, and *vice versa*.

(*) All other persons, except Indians not taxed.

(a) The marshal's manuscript return of Western Tennessee and the return of the enumeration of Shelby County show "Slaves, male, 26 to 45," of that county to be 17 instead of 7, as printed in the census of 1820, and the total slave to be 113 instead of 103, and the total of the county to be 364 instead of 354, and the marshal's return also has the total of the district 287,511 instead of 287,501, as printed in 1820. This increase of 10 is found in column "Free colored: Females, to 14," which has a total of 298 instead of 288, as printed in official census. The total of the State is therefore increased 10. Slaves remain unchanged, because the total was correctly printed as if the 7 had been 17.

(b) In 1800 Cocke and Jefferson reported together.

(c) In 1870 Lake from Obion

(*a*) In 1866 set off to Nevada, except small portions of each attached to Tooele County.
(*b*) Since 1860 set off to Wyoming Territory.
(*c*) In 1863 organized.
(*d*) In 1867 organized. By the survey of 1871 this county is set off to Nevada.
(*e*) Since 1860 absorbed by Juab, Tooele, and Utah.
(*f*) Merged in Box Elder.
(*g*) In 1862 organized.
(*h*) Returned as on the way to California.

(*) All other persons, except Indians not taxed.

(a) In making up the totals of Chittenden County all "*foreigners not naturalized*," 217 in number, were erroneously omitted, and have never heretofore appeared in the total of the State or county.

(b) Caused by an error of addition in the return for each of the towns of Fairfield, Milton, Shelburne, and Williston, in the county of Chittenden; Brookfield, Newbury, Randolph, and Strafford, in the county of Orange; Castleton, Clarendon, Hubbardton, Poultney, Rutland, Shrewsbury, and Wallingford, in the county of Rutland; Dummerston, Guilford, Halifax, and Westminster, in the county of Windham; and Woodstock, in the county of Windsor. The results now given for these counties are correct.

(c) The census of 1790, published in 1791, reports 16 slaves in Vermont. Subsequently, and up to 1860, the number is given as 17. An examination of the original manuscript returns shows that there never were any slaves in Vermont. The original error occurred in preparing the results for publication, when 16 persons, returned as "Free colored," were classified as "Slave."

(d) In the official census of 1860 Harris Gore (population, 10) was included in Caledonia County. In this table it has been transferred to Washington County. (See Table III.)

(*) All other persons, except Indians not taxed.
(a) Then in the District of Columbia.
(b) These are variances from the totals of Virginia, including West Virginia. They result from errors too numerous to be here specified.
(c) Amelia and Nottoway tabulated together, and here placed opposite Amelia.
(d) In 1861 Bland from Giles, Tazewell, and Wythe.
(e) Richmond and Westmoreland tabulated together, opposite Richmond.
(f) Lacking to complete the official totals. Possibly the result of typographical errors. There are no manuscript returns with which to compare the printed census, which has totals of columns but no totals of any horizontal lines, therefore these deficiencies cannot be located in any civil division of the State.

TABLE III.

POPULATION OF CIVIL DIVISIONS LESS THAN COUNTIES

IN

TOTALS, AND AS NATIVE AND FOREIGN, WHITE AND COLORED, AT THE CENSUS OF 1870;

AND AS

WHITE AND COLORED AT THE CENSUSES OF 1860 AND 1850.

TABLE III.—STATE OF ALABAMA.

NOTE.—The marginal column marks beats, precincts, or land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the precincts or beats in which they are respectively situated. The population of each beat or precinct includes that of all towns situated in it.

STATE OF ARKANSAS.

NOTE.—The marginal column marks townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships in which they are respectively situated. The population of each township includes that of all towns situated in it.

(a) In 1868 Columbia and Davidson merged in Little Black.
(b) In 1868 Big Black and McCoy merged in Current River.
(c) In 1868 Cache and Wiley merged in De Munn.
(d) In 1862 Bedford, Smith, and Wittsburgh to Cross County.
(e) In 1862 Cache and Richland to Woodruff County.
(f) In 1862 Griggs and St. Francis from Crittenden County.
(g) In 1862 Plain to Woodruff County.
(h) In 1860 slave population could not be separated in the lesser civil divisions of this county.
(i) In 1869 to Grant County.
(j) In 1868 Wills from Saline.
(k) In 1866 from Sebastian County.
(l) In 1862 Blancet from Mountain.
(m) In 1866 Sugar Creek from Reveille and Boone.
(n) Also 9 Indians.
(o) In 1866 set off to form Scott County.
(p) Also 7 Indians.
(q) In 1861 Mississippi from Upper.
(r) Also 25 Indians.
(s) Also 2 Indians.
(t) On Government reservation.
(u) Also 8 Indians.
(v) Also 1 Indian.
(w) In 1867 to Little River County.
(x) In 1870 from Lawrence County.
(y) Since 1850 to Columbia County.
(z) Since 1850 from Ouachita County.
(aa) Since 1860 Washington from Griggs, Hartsuggs, and Holly.
(bb) Since 1850 Holly and Union from War Eagle.
(cc) Its disappearance cannot be accounted for, as the records of Van Buren County have been destroyed by fire since 1850.
(dd) Or Marshall.

(g) In 1866 Rover from Spring Creek and Upper Lafave.

STATE OF CALIFORNIA.

NOTE.—The marginal column marks townships or supervisor's districts, precincts, and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships or supervisor's districts, precincts, and land-survey townships in which they are respectively situated. The population of each township or supervisor's district, precinct, and land-survey township, includes that of all towns situated in it.

(a) Abolished in 1866 and annexed to townships Nos. 3 and 6.
(b) In 1861 the old townships abolished and county reorganized, as shown in 1870, with boundary lines more or less changed.
(c) In 1861 Cascade to Mountain Spring and Oro.
(d) In 1861 Concow from Kimshew.
(e) In 1861 Eureka to Hamilton and Oregon.
(f) Townships Nos. 1, 2, and 3 annexed to Amador County in 1855, and no change made in the remaining numbers.
(g) Butte and Union returned together, there being no defined line of boundary between them.

(*a*) Also 7 half-breeds.
(*b*) Butte and Union returned together, there being no defined line of boundary between them.
(*c*) Also 3 half-breeds.
(*d*) Also 2 half-breeds.
(*e*) In 1864 organized from unorganized territory.
(*f*) In 1862 merged in Georgetown.
(*g*) In 1850: White, 577; colored, 11.
(*h*) Also 22 Japanese.
(*i*) In 1860 were voting precincts in Coloma Township.
(*j*) In 1850: White, 580; colored, 8.
(*k*) In 1850: White, 1,086; colored, 6.
(*l*) In 1850: White, 419; colored, 1.
(*m*) In 1850: White, 452; colored, 10.
(*n*) In 1850: White, 334; colored, 2.
(*o*) In 1850: White, 710; colored, 4.
(*p*) In 1870 reported in Mud Springs Township.
(*q*) In 1870 part of the city of Placerville.
(*r*) In 1850: White, 5,602; colored, 21.
(*s*) In 1861 Lake Valley from Diamond Spring, Georgetown, Kelsey, Mountain, and Placerville.
(*t*) In 1850: White, 207; colored, 3.
(*u*) Union to Arcata.
(*v*) Also 5 half-breeds.
(*w*) Also 1 half-breed.
(*x*) Also 6 half-breeds.
(*y*) Also 10 half-breeds.
(*z*) Part of Lower Lake in 3d District.
(*aa*) Part of Lakeport in 3d District.
(*bb*) Also 14 half-breeds and 4 Asiatics.
(*cc*) In 1850: White, 1,598; colored, 12.
(*dd*) Also 10 half-breeds and 4 Asiatics.
(*ee*) Also 2 Japanese.
(*ff*) In 1870 abolished.
(*gg*) Also 8 half-breeds and 2 Asiatics.
(*hh*) In 1863 Soledad from Los Angeles and Tejon.
(*ii*) In 1862 abolished.
(*jj*) In 1870 Wilmington from San Pedro.
(*kk*) In 1862 merged in Saucelito.
(*ll*) In 1862 Nicassio from Bolinas and San Rafael
(*mm*) Also 78 half-breeds.
(*nn*) Exclusive of city of Los Angeles.
(*oo*) Or Mendocino.

(*a*) Reported in 1860 as a township, but such township was never organized in Mendocino County. That portion which was to have been "Big Rock" Township became a part of Lake County when organized in 1860.
(*b*) In 1850: White, 1,083; colored, 9.
(*c*) Also 2 Asiatics.
(*d*) Also 14 Asiatics.
(*e*) In 1850: Whites, 159.
(*f*) Also 1 Asiatic.
(*g*) In 1865 Meadow Lake from Washington.
(*h*) In 1870 reported in Plumas Township.
(*i*) In 1870 reported in Honey Lake Valley Township, Lassen County.
(*j*) In 1870 reported in Lassen County.
(*k*) In 1870 reported in Indian Township.
(*l*) In 1870 reported as a deserted mining town.
(*m*) In 1870 reported in Quartz Township.
(*n*) Also 1 Asiatic.
(*o*) Also 56 Asiatics.
(*p*) In 1850: White, 333; colored, 2.
(*q*) Also 243 Asiatics.
(*r*) Also 279 Asiatics.
(*s*) In 1850: White, 168.
(*t*) Also 96 Asiatics.
(*u*) Also 54 Asiatics.
(*v*) In 1850: White, 6,629; colored, 191.
(*w*) Also 988 Asiatics.
(*x*) Also 594 Asiatics.
(*y*) Also 72 Asiatics.
(*z*) Also 1 Japanese.
(*aa*) Also 219 Asiatics.
(*bb*) Also 103 Asiatics.
(*cc*) Also 9 Asiatics.
(*dd*) Also 2 Asiatics.
(*ee*) In 1867 Belleville from San Bernardino and San Salvador.
(*ff*) In 1860 San Mateo was a voting precinct in San Bernardino Township and is now a part of Belleville Township.
(*gg*) Also 8 Japanese.
(*hh*) Also 3 Japanese.
(*ii*) Also 2 Japanese.

(*a*) Returned with Lassen and Tehama.
(*b*) In 1860 Merrill's was called Moon's.
(*c*) In 1866 Farmersville, King's River and Packwood from Visalia
(*d*) In 1866 to Kern County.
(*e*) In 1868 Venice from Farmersville and Visalia.
(*f*) In 1866 White River from Tule River.
(*g*) In 1862 Don Pedro's Bar to Big Oak Flat.
(*h*) In 1862 Jacksonville merged in Chinese Camp.
(*i*) East Bear River and West Bear River from Bear River.
(*j*) In 1850: White, 272; colored, 3.
(*k*) In 1850: White, 129; colored, 1.
(*l*) In 1850: White, 316; colored, 4.
(*m*) Exclusive of city of Marysville.

STATE OF CONNECTICUT.

NOTE.—The marginal column marks towns; the first indentation, cities; the second, villages. Names of villages are placed under the names of the towns in which they are respectively situated. The population of each town includes that of all villages situated in it.

(a) Also 13 Indians. (b) Also 1 Indian. (c) Also 12 Indians. (d) Also 2 Indians and 3 Chinese

STATE OF FLORIDA.

NOTE.—The marginal column marks precincts, which in some counties were returned according to their former boundaries. In other counties the names in the marginal column are only names of polling-places around which voters and their families have been grouped. The first indentation marks cities; the second, towns. Names of towns are placed under the names of the precincts in which they are respectively situated. The population of each precinct includes that of all towns situated in it.

(*) Incomplete; the precincts were not separately returned.

(a) Its precinct not ascertained.

STATE OF GEORGIA.

NOTE.—The marginal column marks militia districts, whose numbers are official; the names are those in general use. The first indentation marks cities; the second, towns. Names of towns are placed under the names of the militia districts in which they are respectively situated. The population of each militia district includes that of all towns situated in it.

STATE OF ILLINOIS.

NOTE.—The marginal column marks townships, precincts, and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the name of the township, precinct, or land-survey township in which they are respectively situated. The population of each township, precinct, or land-survey township includes that of all towns situated in it.

(a) In 1852 organized.
(b) In 1859 organized.
(c) Exclusive of city of Sterling.
(d) In 1860 organized.
(e) In 1853 Bourbonnais, Carey, Momence, and Rockville to Kankakee County.
(f) Exclusive of city of Joliet.
(g) In 1855 name changed from Butler to Cherry Valley.
(h) In 1869 name changed from Howard to Durand.
(i) In 1869 Lysander merged in Pecatonica.
(j) In 1860 and 1870, exclusive of city of Rockford.
(k) In 1862 El Paso from Palestine.
(l) Exclusive of city of El Paso.

TABLE III.—STATE OF INDIANA.

NOTE.—The marginal column marks townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships in which they are respectively situated. The population of each township includes that of all towns situated in it.

(a) Exclusive of city of Richmond.
(b) Exclusive of city of Columbia.
(c) Also 1 Indian.
(d) In September, 1860, Etna organized from the township of Washington, in Noble County.

STATE OF IOWA.

NOTE.—The marginal column marks townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships in which they are respectively situated. The population of each township includes that of all towns situated in it.

(x) In 1868 Woodstock from Troy.
(y) In 1865 Wall Lake from Vernon.
(z) Exclusive of city of Fort Dodge.
(aa) Exclusive of Sioux City.

TABLE III.—STATE OF KANSAS.

NOTE.—The marginal column marks townships and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships or land-survey townships in which they are respectively situated. The population of each township or land-survey township includes that of all towns situated in it.

STATE OF KENTUCKY.

NOTE.—The marginal column marks precincts, or election districts, whose numbers are official; the names are those in general use. The first indentation marks cities; the second, towns. Names of towns are placed under the names of the precincts or election districts in which they are respectively situated. The population of each precinct or election district includes that of all towns situated in it.

STATE OF LOUISIANA.

NOTE.—The marginal column marks wards, whose numbers are official; the names are those in general use. The first indentation marks cities; the second, towns. Names of towns are placed under the names of the wards in which they are respectively situated. The population of each ward includes that of all towns situated in it.

(a) Also 1 Indian.

STATE OF MAINE.

NOTE.—The marginal column marks towns, unless otherwise designated; the first indentation, cities; the second, villages. Names of villages are placed under the names of the towns in which they are respectively situated. The population of each town includes that of all villages situated in it.

(*a*) Part of Hartland to Pittsfield.
(*b*) In 1861 Bloomfield merged in Skowhegan.
(*c*) Also 5 Indians.
(*d*) Part of Smithfield to Norridgewock.
(*e*) Part of Mercer to Norridgewock and Starks.
(*f*) In 1860 Appleton, Camden, Hope, North Haven, and Vinal Haven to Knox County.
(*g*) In 1855 Morrill from Belmont.
(*h*) In 1860 Winterport from Frankfort.
(*i*) In 1863 part of Frankfort to Monroe.
(*j*) In 1857 Stockton from Prospect.
(*k*) Since 1850 depopulated.
(*l*) In 1863 Columbia Falls from Columbia.
(*m*) In 1852 Deblois from township 17, middle division.
(*n*) In 1854 Dayton from Hollis.
(*o*) In 1870 part of Limington to Limerick.

TABLE III.—STATE OF MARYLAND.

NOTE.—The marginal column marks election districts, whose numbers are official; the names are those in general use. The first indentation marks cities; the second, towns. Names of towns are placed under the names of the election districts in which they are respectively situated. The population of each election district includes that of all towns situated in it.

Delta (ii)	.....	.....	.....	.....	.....	1052	(gg)	.....	.....

(a) In 1868 organized.
(b) In 1866 organized.
(c) Also 1 Indian.
(d) In 1856 Chickaming from New Buffalo.
(e) In 1859 incorporated.
(f) In 1859 organized.
(g) Exclusive of city of Coldwater.
(h) In 1861 incorporated.
(i) Also 4 Indians.
(j) Also 51 Indians.
(k) Exclusive of city of Battle Creek.
(l) Exclusive of city of Marshall.
(m) Also 53 Indians.
(n) Also 62 Indians.
(o) Also 5 Indians.
(p) In 1867 Marion from Charlevoix.
(q) In 1853 organized.
(r) In 1855 Evangeline and Eveline from Charlevoix.
(s) Also 213 Indians.
(t) In 1869 organized.
(u) In 1860 organized.
(v) Also 65 Indians.
(w) Also 69 Indians.
(x) Also 46 Indians.
(y) Also 8 Indians.
(z) Also 52 Indians.
(aa) Also 47 Indians.
(bb) Also 600 Indians.
(cc) Also 193 Indians.
(dd) Also 33 Indians.
(ee) Also 76 Indians.
(ff) Also 58 Indians.
(gg) Also 120 Indians.
(hh) Exclusive of city of Niles.
(ii) Its township not ascertained.

(*a*) In 1857 name changed from Danville to Lowell.
(*b*) In 1854 Nelson from Courtland.
(*c*) In 1857 Solon from Algoma.
(*d*) In 1855 Tyrone from Sparta.
(*e*) In 1861 organized.
(*f*) In 1865 organized.
(*g*) In 1865 Sibley from Copper Harbor.
(*h*) Also 1 Indian.
(*i*) Also 2 Indians.
(*j*) In 1863 name changed from Allison to Burnside.
(*k*) In 1850 Imlay from Almont and Lapeer.
(*l*) In 1866 organized.
(*m*) In 1855 organized.
(*n*) Also 4 Indians.
(*o*) In 1869 Mayfield from Lapeer.
(*p*) Exclusive of city of Lapeer.
(*q*) In 1869 incorporated.
(*r*) In 1858 organized.
(*s*) Also 13 Indians.
(*t*) In 1863 organized.
(*u*) Also 249 Indians.
(*v*) Since 1860 from Houghton County.
(*w*) Also 69 Indians.
(*x*) Also 264 Indians.
(*y*) In 1853 organized.
(*z*) Also 194 Indians.
(*aa*) Also 364 Indians.
(*bb*) Also 16 Indians.
(*cc*) Also 38 Indians.
(*dd*) In 1867 organized.
(*ee*) Exclusive of part of city of Adrian.
(*ff*) In 1853 incorporated.
(*gg*) In 1869 Clinton from Tecumseh.
(*hh*) Also 7 Indians.
(*ii*) In 1857 name changed from Tuscola to Cohoctah.
(*jj*) Since 1860 name changed from East Unadilla to Milan.
(*kk*) Also 99 Indians.
(*ll*) Also 442 Indians.
(*mm*) Also 54 Indians.
(*nn*) Also 140 Indians.
(*oo*) Also 132 Indians.
(*pp*) Also 325 Indians.
(*qq*) In 1870 organized.
(*rr*) Since 1860 to Benzie County.

(a) In 1854 organized.
(b) In 1857 organized.
(c) In 1855 organized.
(d) In 1862 organized.
(e) Exclusive of city of Saginaw.
(f) In 1859 incorporated.
(g) In 1858 organized.
(h) In 1853 organized.
(i) Also 55 Indians.
(j) Also 98 Indians.
(k) In 1860 organized.
(l) Also 70 Indians.
(m) In 1867 organized.
(n) In 1851 organized.
(o) In 1855 Forester from Austin.
(p) In 1857 Marion from Austin.
(q) In 1856 organized.
(r) In 1850 Buel from Elk and Lexington.
(s) Also 4 Indians.
(t) In 1868 organized.
(u) In 1865 organized.
(v) In 1869 organized.
(w) In 1857 Maple Valley from Speaker.
(x) In 1861 organized.
(y) Also 7 Indians.
(z) Exclusive of city of Corunna.
(aa) In 1869 incorporated.
(bb) In 1854 Fairfield from Middlebury.
(cc) Also 1 Indian.
(dd) Exclusive of city of Owasso.
(ee) In 1859 East China from China.
(ff) Also 2 Indians.
(gg) In 1866 organized.
(hh) Exclusive of city of Port Huron.
(ii) In 1857 incorporated.
(jj) Exclusive of city of St. Clair.
(kk) In 1858 incorporated.
(ll) In 1854 Almer from Indian Fields.
(mm) In 1851 Arbela from Tuscola.
(nn) Formerly Waterloo.
(oo) In 1854 Indian Fields from Vassar.
(pp) Formerly Rogers.
(qq) In 1859 organized.
(rr) Not township as ascertained.

(*x*) Also 1 Indian.
(*y*) Also 4 Indians.
(*z*) Exclusive of city of Wyandotte.

STATE OF MINNESOTA.

NOTE.—The marginal column marks townships and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships or land-survey townships in which they are respectively situated. The population of each township or land-survey township includes that of all towns situated in it.

(x) In 1869 formerly Moore's Prairie.

STATE OF MISSISSIPPI.

NOTE.—The marginal column marks beats, districts, precincts, or land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the civil divisions of the county in which they are respectively situated. The population of each beat, district, precinct, or land-survey township includes that of all towns situated in it.

(*) Incomplete; the other principal civil divisions were not separately returned.

(a) Its population included with city of Vicksburg, annexed July 21, 1870.

(b) Also 9 Indians.

STATE OF MISSOURI.

NOTE.—The marginal column marks townships or land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships or land-survey townships in which they are respectively situated. The population of each township or land-survey township includes that of all towns situated in it.

STATE OF NEBRASKA.

NOTE.—The marginal column marks precincts and land-survey townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the precincts or land-survey townships in which they are respectively situated. The population of each precinct or land-survey township includes that of all towns situated in it.

STATE OF NEVADA.

NOTE.—The marginal column marks precincts or townships; the first indentation, cities; the second, all other localities whose names are placed under the names of the precincts or townships in which they are respectively situated. The population of each precinct or township includes that of all localities situated in it.

STATE OF NEW HAMPSHIRE.

NOTE.—The marginal column marks towns; the first indentation, cities; the second, villages. Names of villages are placed under the names of the towns in which they are respectively situated. The population of each town includes that of all villages situated in it.

(*a*) In 1868 from Grafton County.

(*b*) In 1860 incorporated.

(*c*) Also 1 Indian.

STATE OF NEW JERSEY.

NOTE.—The marginal column marks townships; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships in which they are respectively situated. The population of each township includes that of all towns situated in it.

(*) The text gives the city of Albany as it was previous to the recent legislation changing its limits. The population of the city as now bounded is 76,216.
(a) Also 1 Indian.
(b) In 1856 Ward from Alfred and Amity.
(c) In 1854 Alma from Willing.
(d) In 1855 Wellsville from Andover, Scio, and Willing.
(e) In 1851 Willing from Independence.
(f) In 1856 to Livingston County.
(g) Also 3 Indians.
(h) Exclusive of city of Binghamton.
(i) In 1855 Binghamton from Chenango.
(j) In 1867 incorporated.
(k) In 1854 Port Crane from Chenango.
(l) See note (s.) Chenango County. Total, 127: Native 126; foreign, 1; white, 127.
(m) In 1859 Kirkwood from Conklin.
(n) In 1867 name changed from Port Crane to Fenton.
(o) See note (h.) Delaware County. Total, 1,286: Native, 1,109; foreign, 177; white, 1,248; colored, 38.
(p) In 1852 name changed from Burton to Allegany.
(q) In 1861 name changed from Bucktooth to Salamanca.
(r) In 1854 Bucktooth from Little Valley.
(s) In 1854 East Otto from Otto.
(t) In 1852 name changed from Rice to Ischua.
(u) See note (x.) Erie County. Total, 991: Native, 829, foreign, 165; white, 985; colored, 9.
(v) In 1854 East [illegible] from Salamanca.
(w) Exclusive of city of Olean.

(b) In 1851 Torrey from Benton and Milo.

STATE OF NORTH CAROLINA.

NOTE.—The marginal column marks townships, their names and numbers being official; the first indentation, cities; the second, towns. Names of towns are placed under the names of the townships in which they are respectively situated. The population of each township includes that of all towns situated in it.
